SchoolSync

One platform for the whole school day.

Management, teachers, students and parents, on the web and on the phone. A tour of the product, screen by screen.

12 modules · 4 role homes · Web + mobile · Own database per school

Product catalogue · Screens are from a demo school with sample data.

CONTENTS

What is inside

Chapters follow the way a school is run: set it up, run the day, then see it through each person's eyes. Click a chapter to jump to it.

Overview 1–4
What SchoolSync is and how it is built

Management home 7–8
The dashboard, on the web and on the phone

People & admissions 12–14
Students, staff, imports, applications

Exams & results 16–17
Schedules, mark review, report cards

Communication & events 22–23
Announcements and the school calendar

Settings & access 26–27
Roles, users, branding and the audit log

For students 32–35
Home, tasks, learning, results

Security & privacy 39
How each school's data is protected

Going live 41
From an empty site to a school in use

Getting started 5–6
Find your school, sign in, take the tour

School setup 9–11
Years, classes, teachers, timetable, promotion

Attendance & leave 15
Daily attendance, trends, leave decisions

Fees & finance 18–21
Invoices, payments, defaulters, expenses

Operations & reports 24–25
Transport, library and the reports hub

For teachers 28–31
Roll call, homework and marks

For parents 36–38
Attendance, fees and school news

Pricing & licence 40
Per student, per academic year

AT A GLANCE

One product. Four ways to use it.

SchoolSync gives each person a home built for their job, not one dashboard with buttons hidden. Everyone works from the same records and sees only what they are allowed to.

12
Modules
From admissions and attendance to fees, exams and the library.

4
Role homes
Management, teacher, student and parent.

1 per school
Database
Every school's data is kept apart from every other's.

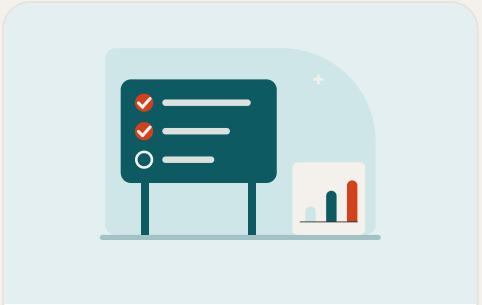

2
Ways in
A web app and a mobile app, from the same records.

Management

Principal, administrator, accountant and office roles. See the whole school, approve, publish and report.

WEB + MOBILE

Teachers

Today's lessons, roll call, homework and marks for the classes they teach, and nothing else.

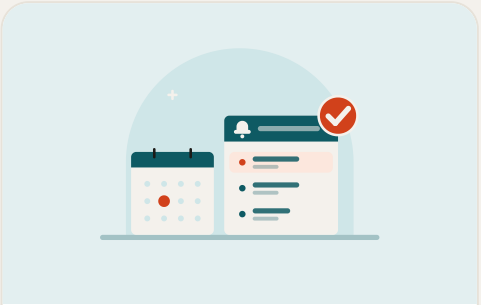

WEB + MOBILE

Students

Timetable, homework, tasks, results and the school calendar in five simple tabs.

WEB + MOBILE

Parents

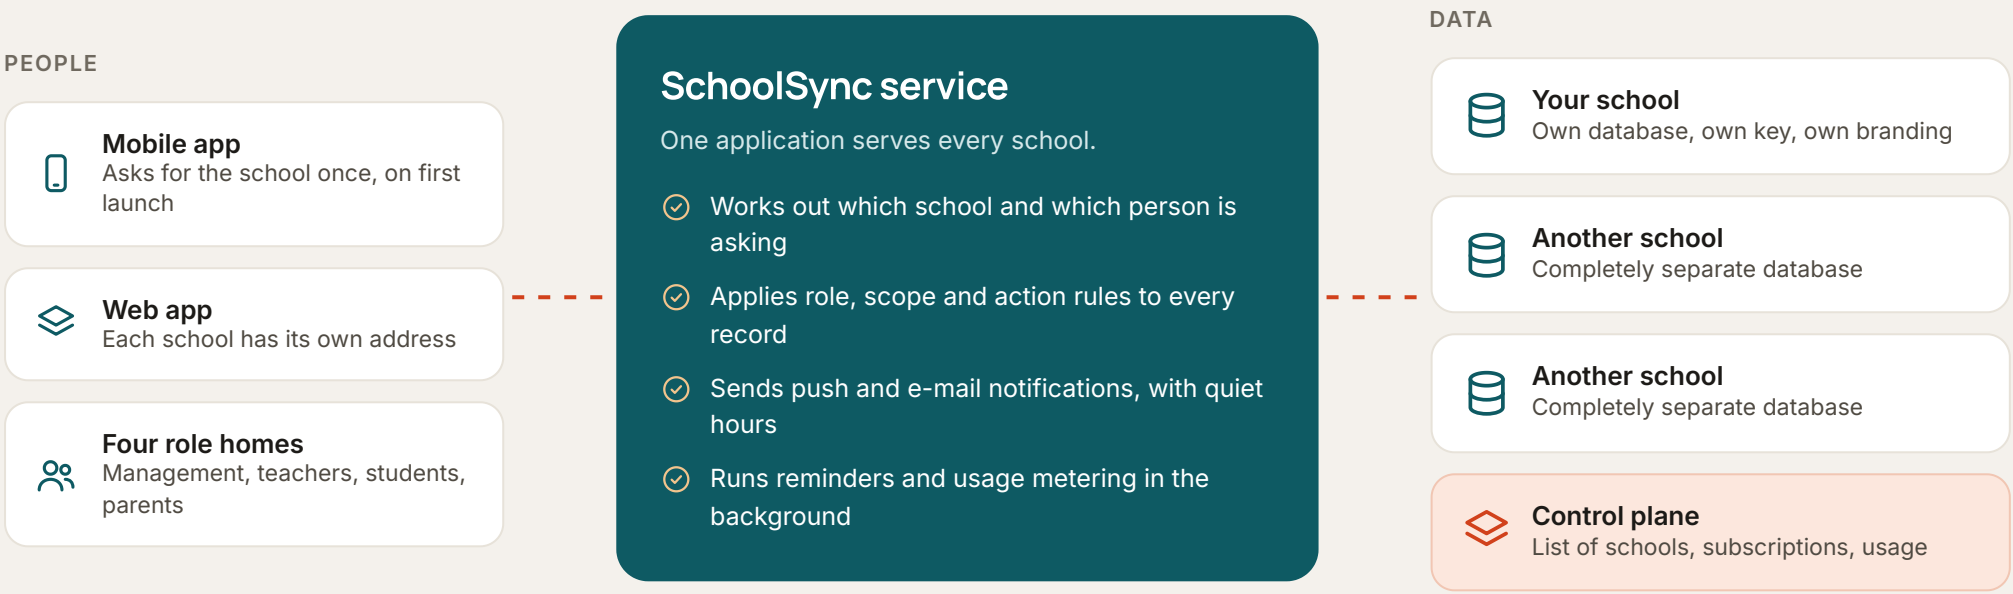

Attendance, homework, results and fees for each linked child, with school news in one place.

WEB + MOBILE

HOW IT IS BUILT

One codebase, one database per school

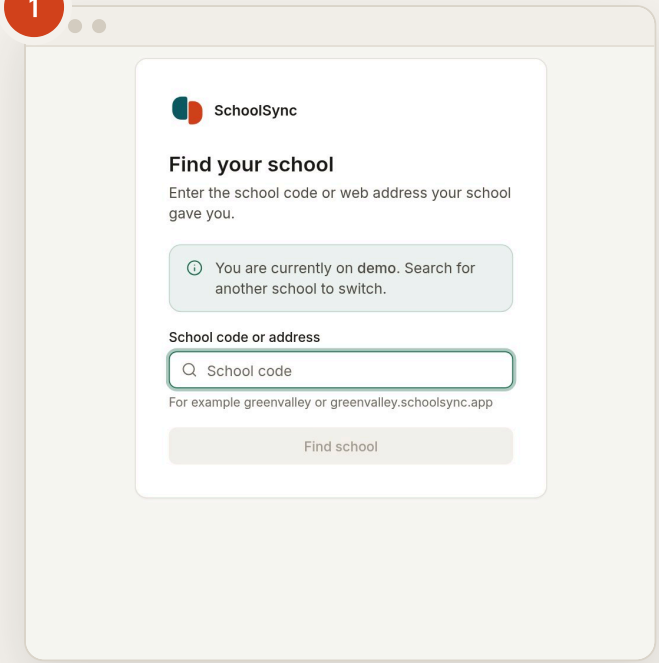

Every school is a site with its own database, its own sign-in key and its own colours. A sign-in from one school can never open another.

From the school’s address to the first screen

Each school has its own address. People enter it once, sign in with the details the school gave them, and a short tour introduces the screens for their role.

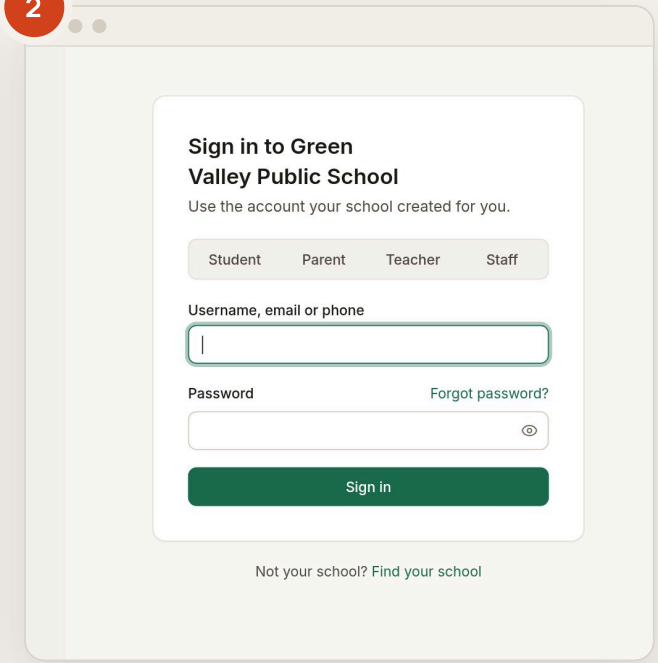

1

Find your school

Enter the school code or web address once. A school’s own address goes straight to its sign-in.

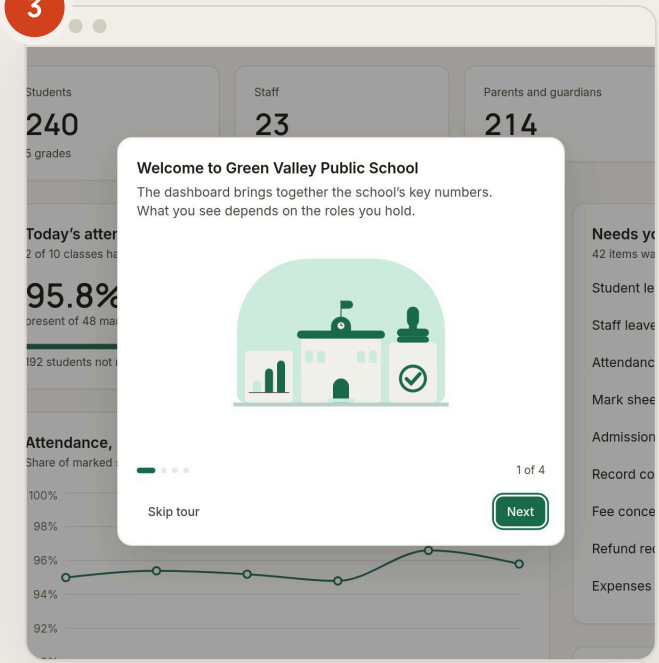

2

Sign in

Choose Student, Parent, Teacher or Staff, then use a username, e-mail or phone number.

3

A short welcome tour

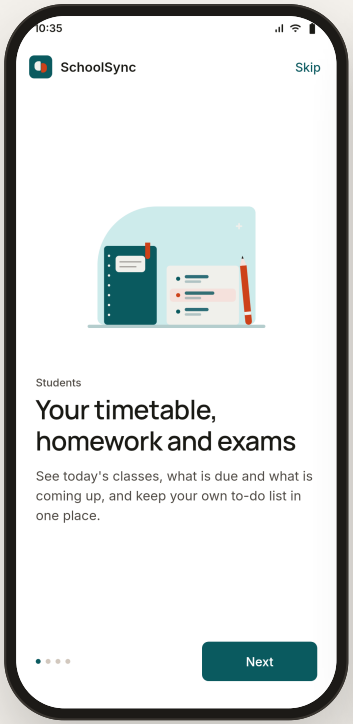

The first sign-in opens a four-step tour of the screens that role uses. It can be skipped or replayed.

GETTING STARTED · MOBILE APP

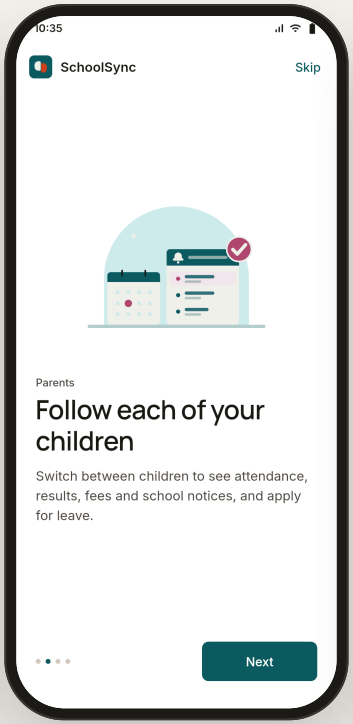

The same start on the phone

The app asks for the school once, on first launch, and remembers it. After that it opens straight to the sign-in, in the school's own colours.

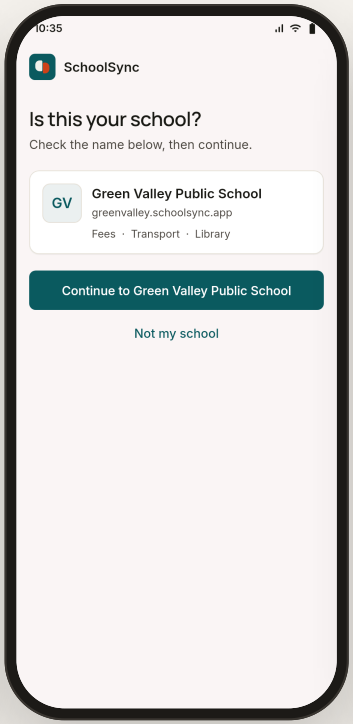

- Short introductions for students and for parents
- Confirm the school by name before continuing
- Sign in with username, e-mail, phone, admission number or employee ID

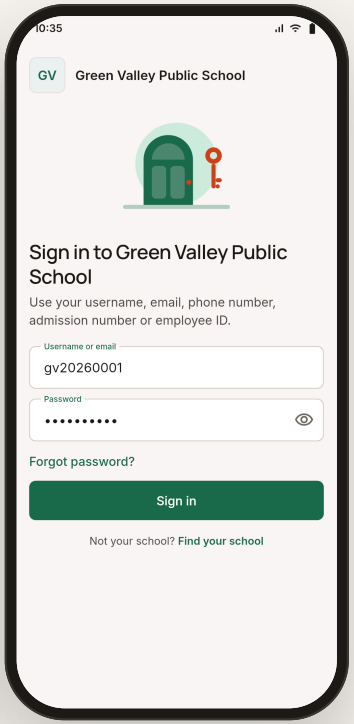

Welcome, students
Timetable, homework and exams in one place.

Welcome, parents
Follow each child: attendance, results, fees and notices.

Connect your school
Check the school's name, then continue. Wrong school? Choose another.

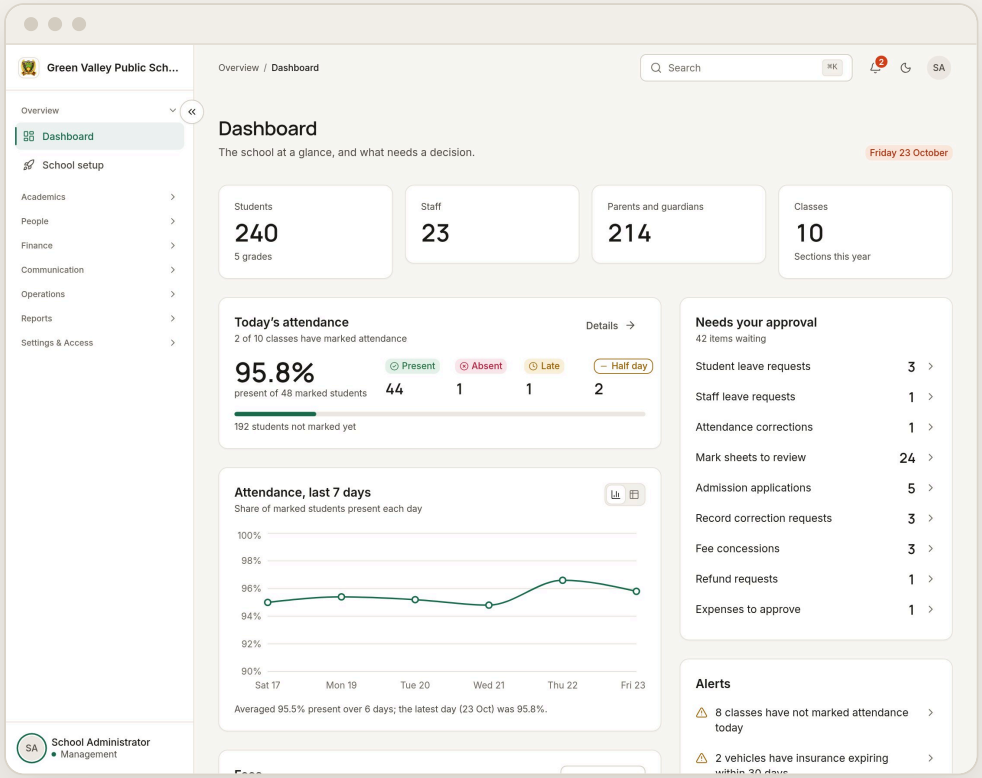

Sign in
The school's logo and colours appear once it is connected.

MANAGEMENT · HOME

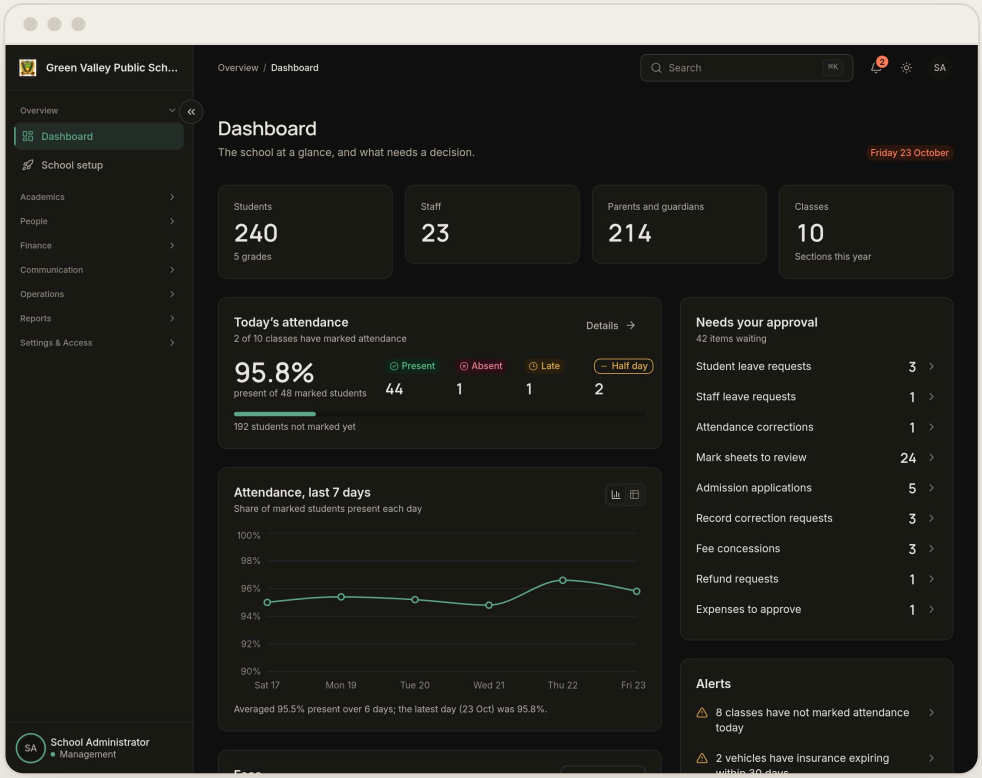

The whole school at a glance

Principals and administrators land on today's numbers: who is in, what needs a decision and how fees are going. Every tile opens the screen where you act on it.

- Students, staff, parents and classes in one row
- Today's attendance, with classes still to mark
- A queue of approvals: leave, corrections, mark sheets, admissions
- Seven-day attendance trend, with a table view

Management dashboard
Headline numbers, today's attendance and the approval queue on one screen.

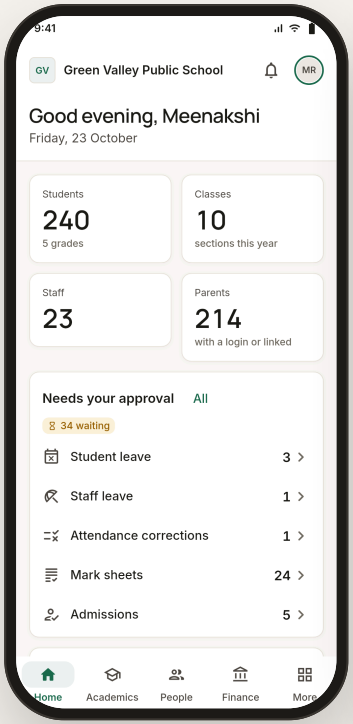

Dark mode
Anyone can switch to a dark theme from the top bar.

MANAGEMENT · MOBILE

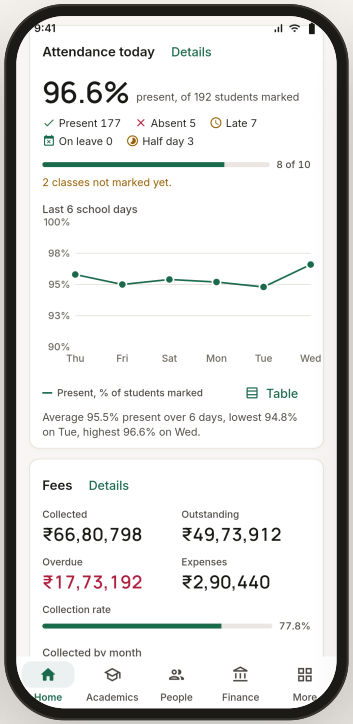

Decisions from the phone

The principal's app opens on the same numbers and the same approval queue, so a leave request can be decided between meetings.

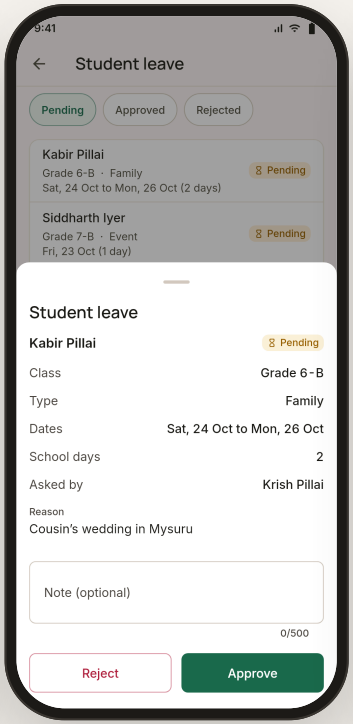

- Headline numbers and the approval queue on Home
- Approve or reject a request with a note
- Finance summary: collected, outstanding, overdue

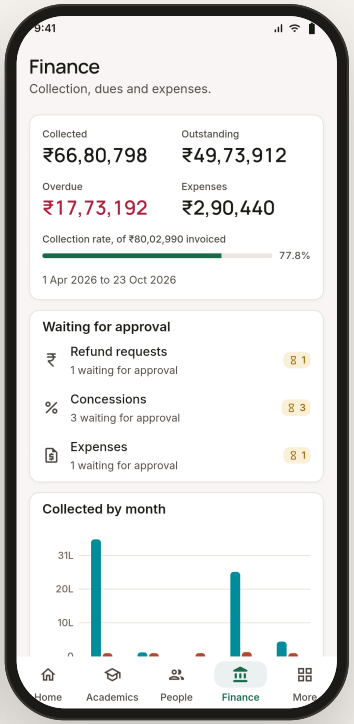

Home
Students, classes, staff and parents, then everything waiting for a decision.

Attendance trend
Today's attendance, classes still to mark and a seven-day trend with a table view.

Decide a request
Open a leave request, add a note, approve or reject.

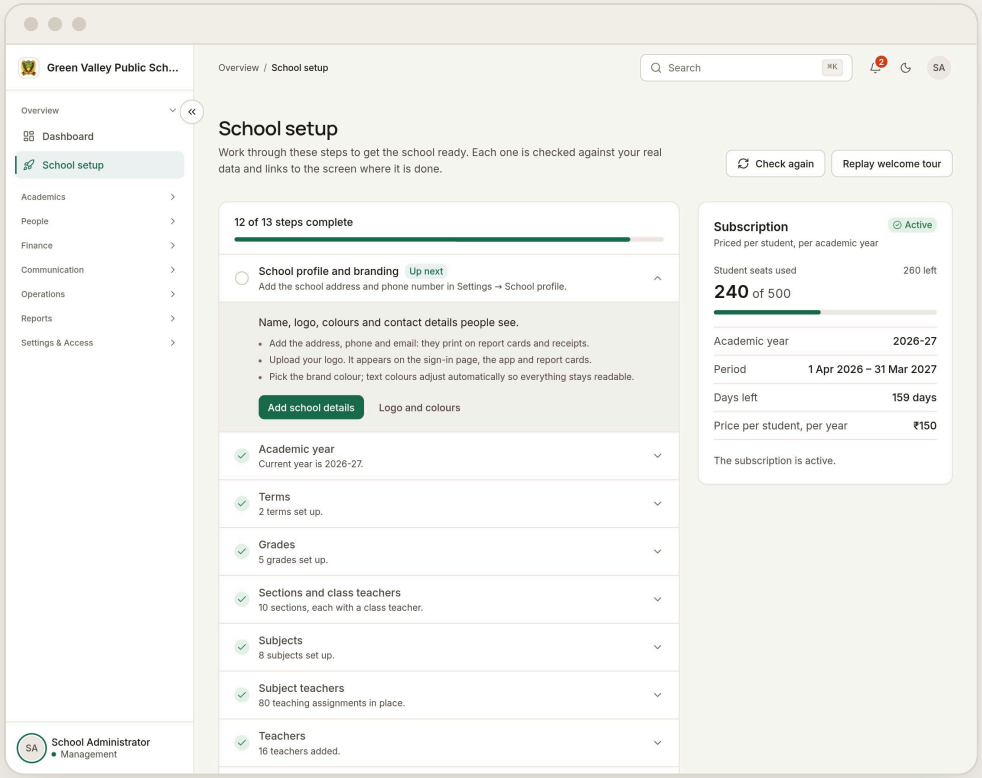

Finance
Collected, outstanding, overdue and expenses at a glance.

SCHOOL SETUP · GETTING READY

A guided start for a new school

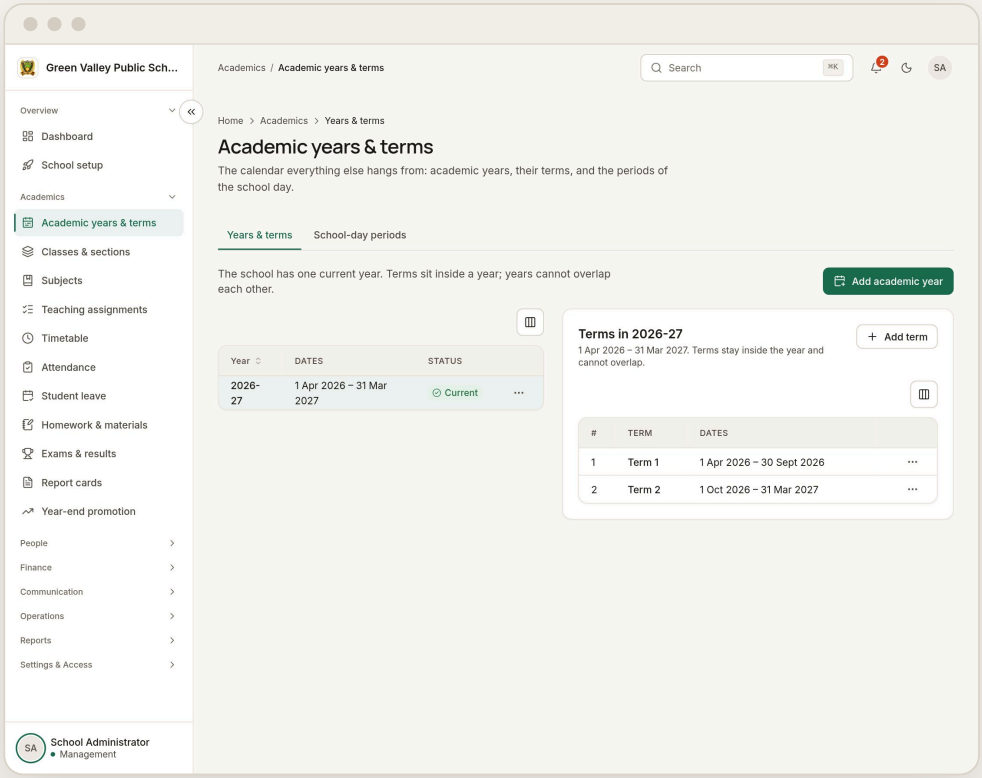

The setup page checks the school's real data and shows what is left: profile and branding, terms, grades, sections and subjects. Each step links to the screen where it is done.

- A checklist that ticks itself off
- Subscription and seats shown alongside
- One current academic year at a time
- Terms and school-day periods feed the timetable

School setup

A checklist driven by the school's own data, with the subscription and seat count beside it.

Academic years and terms

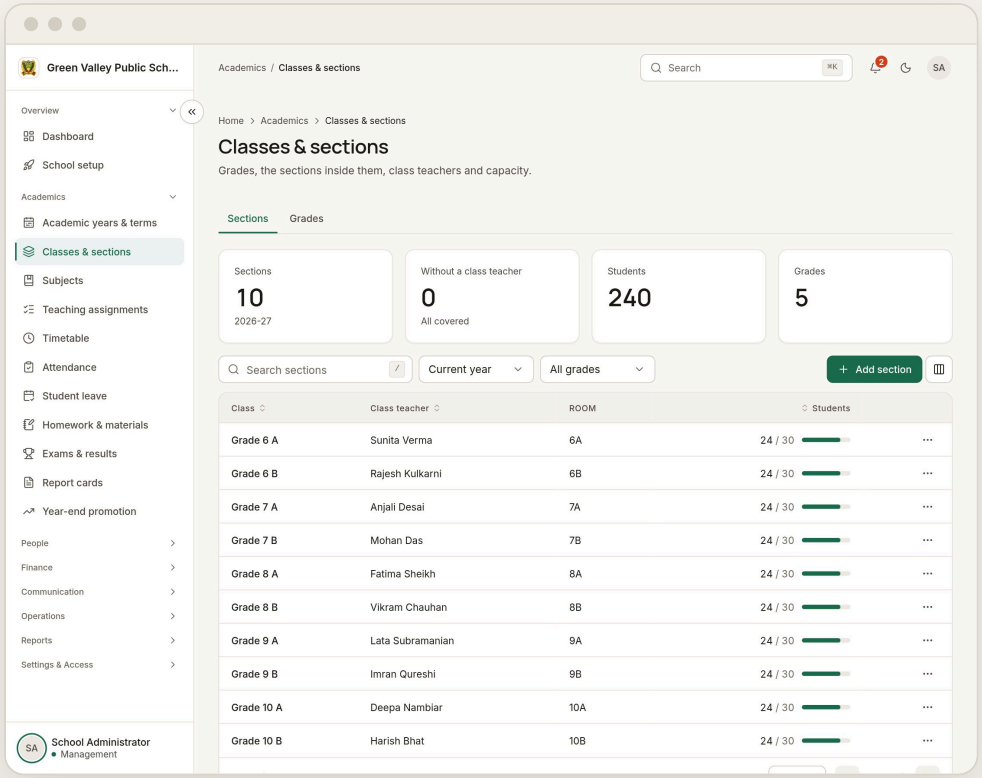

The calendar everything else hangs from. School-day periods are set up here too.

SCHOOL SETUP · CLASSES

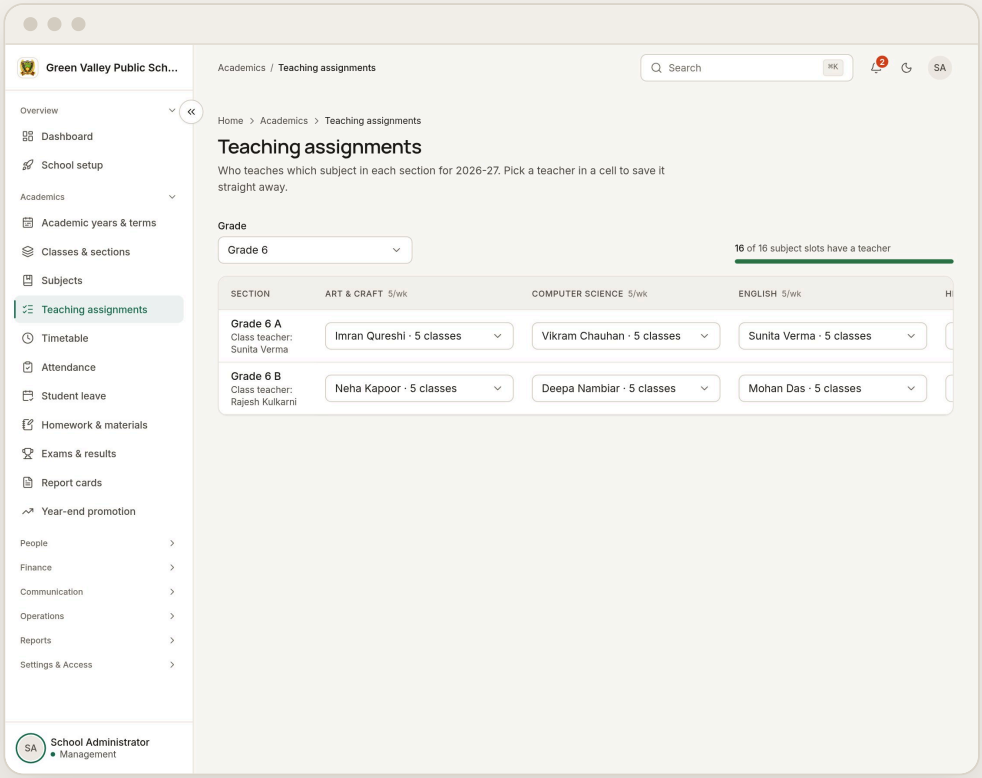

Classes, sections and who teaches what

Build grades and sections for the year, then put a teacher against each subject in each section.

- Class teacher, room and how full each section is
- Pick a teacher in a cell and it saves straight away
- A progress bar shows subject slots still without a teacher

Classes and sections
Sections with class teacher, room and capacity.

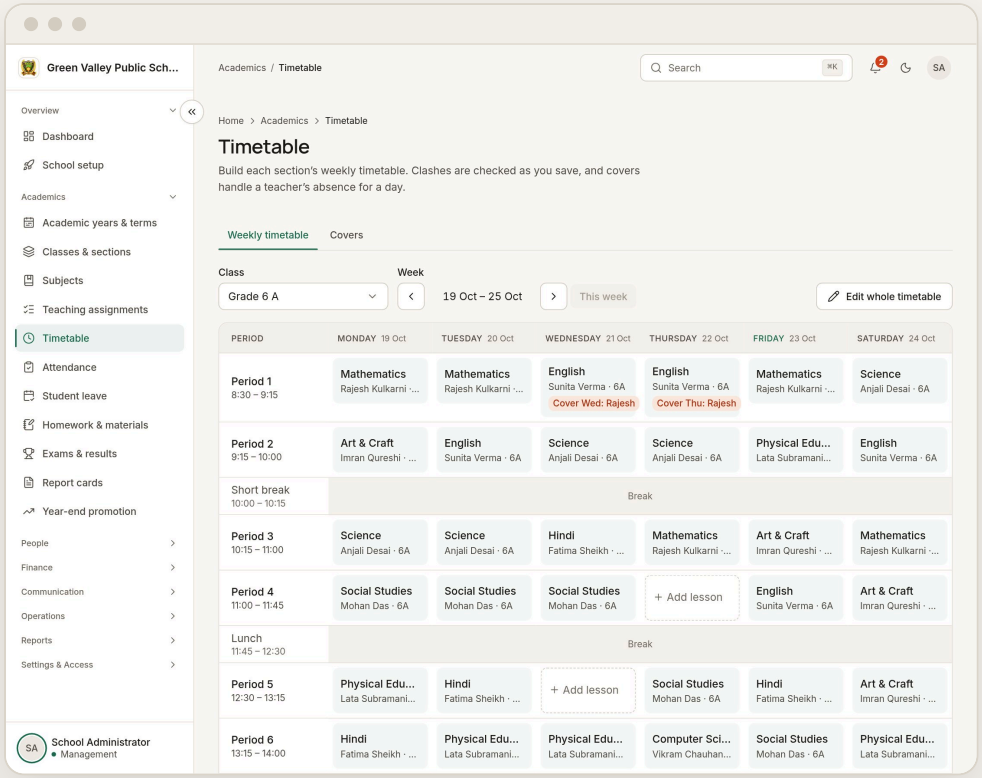

Teaching assignments
Sections by subject. Each teacher's current load is shown next to their name.

SCHOOL SETUP · TIMETABLE

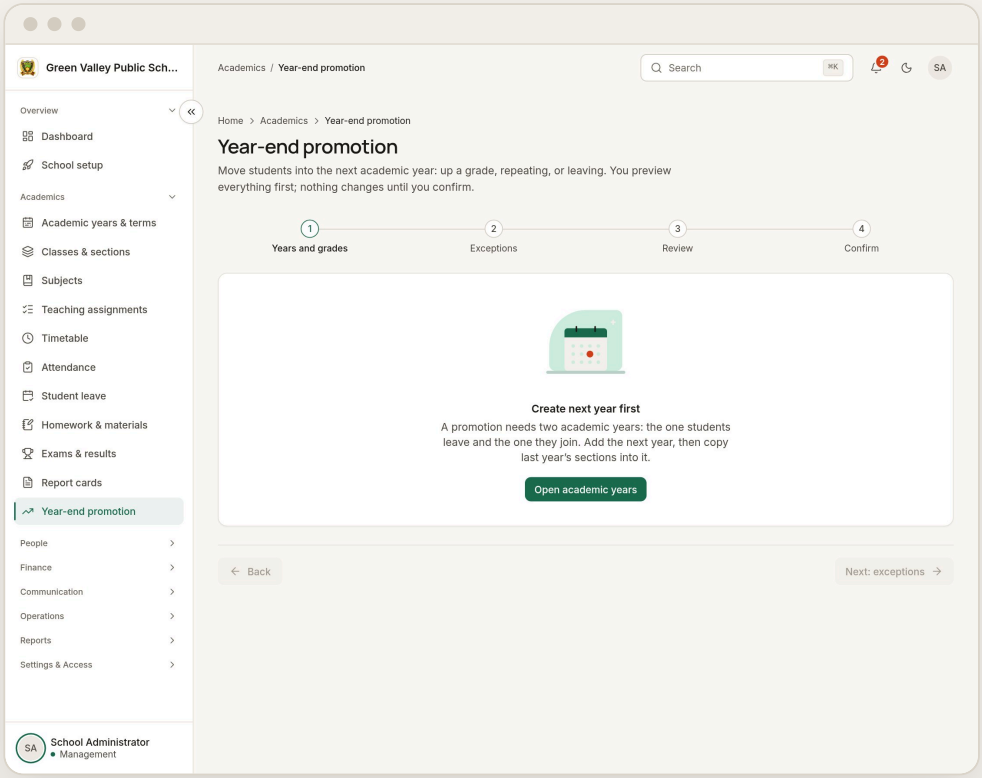

Timetable, covers and year-end promotion

Build each section's weekly timetable, cover for absent teachers, and move a whole year of students up when the year ends.

- Clashes are checked as you save
- Covers for a teacher's absence on a given day
- Promotion is previewed in full before anything changes

Timetable editor
Periods by weekday for one section. Covers are marked on the lessons they replace.

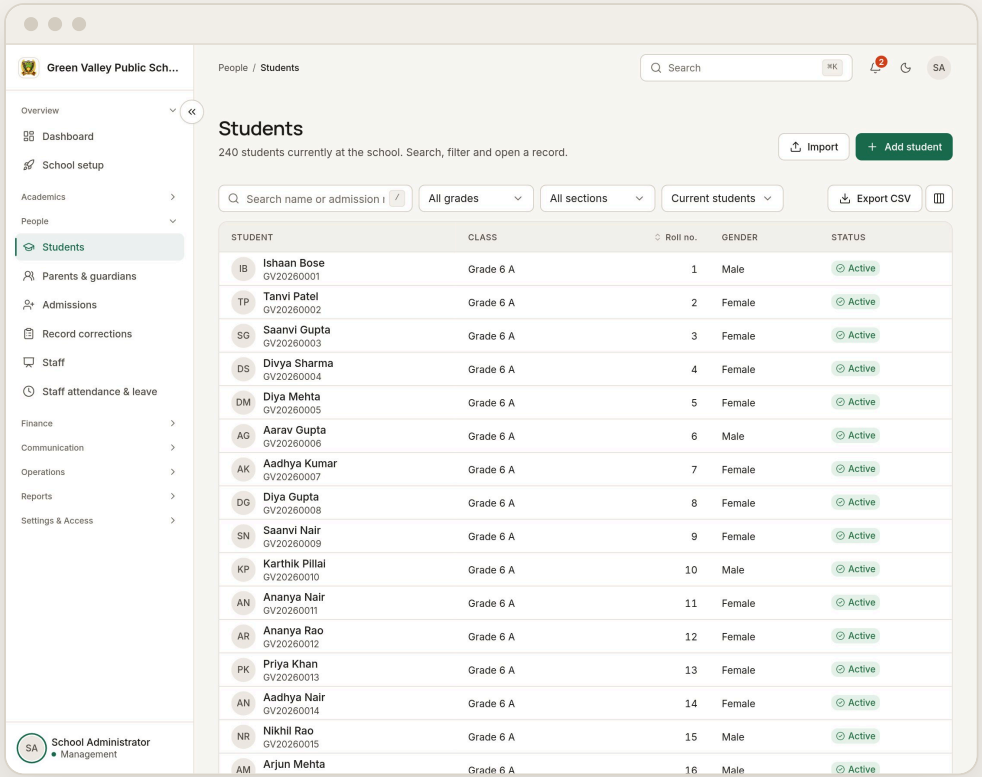

Year-end promotion
A four-step guided flow: years and grades, exceptions, review, confirm.

PEOPLE · STUDENTS

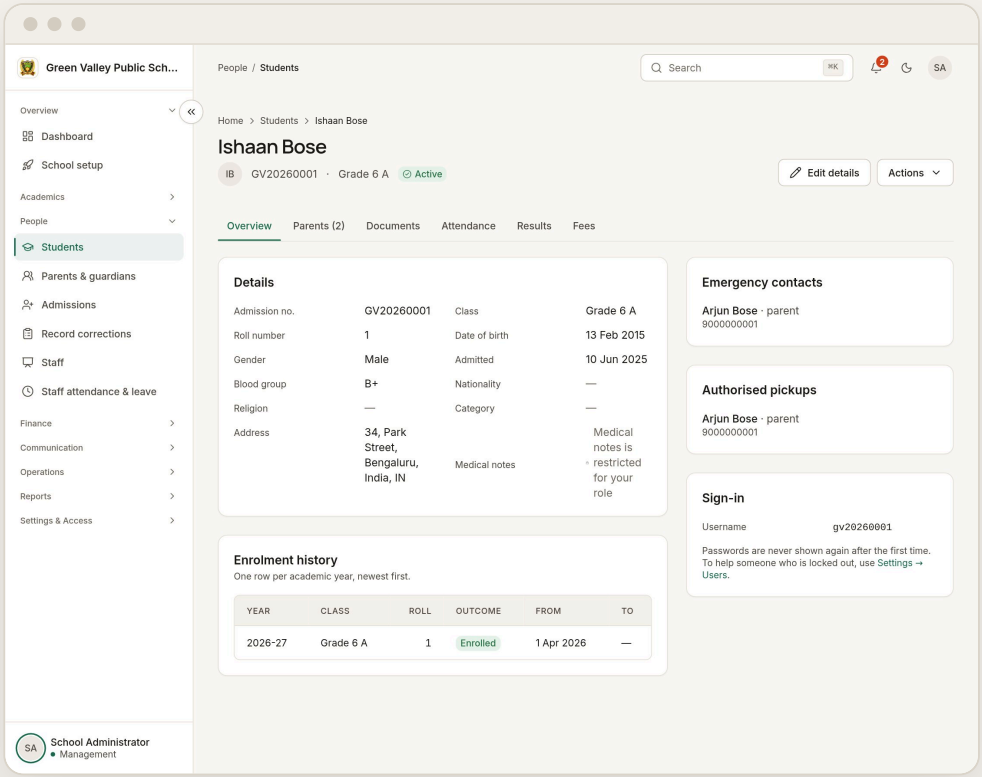

Student records, found in seconds

Search by name or admission number, filter by grade, section and status, and choose which columns to show. Open a student for the full profile.

- Add one student, or import many from a CSV
- Export the filtered list to CSV
- Profile with parents, documents, attendance, results and fees

Students
Search, filters, CSV export and a column picker.

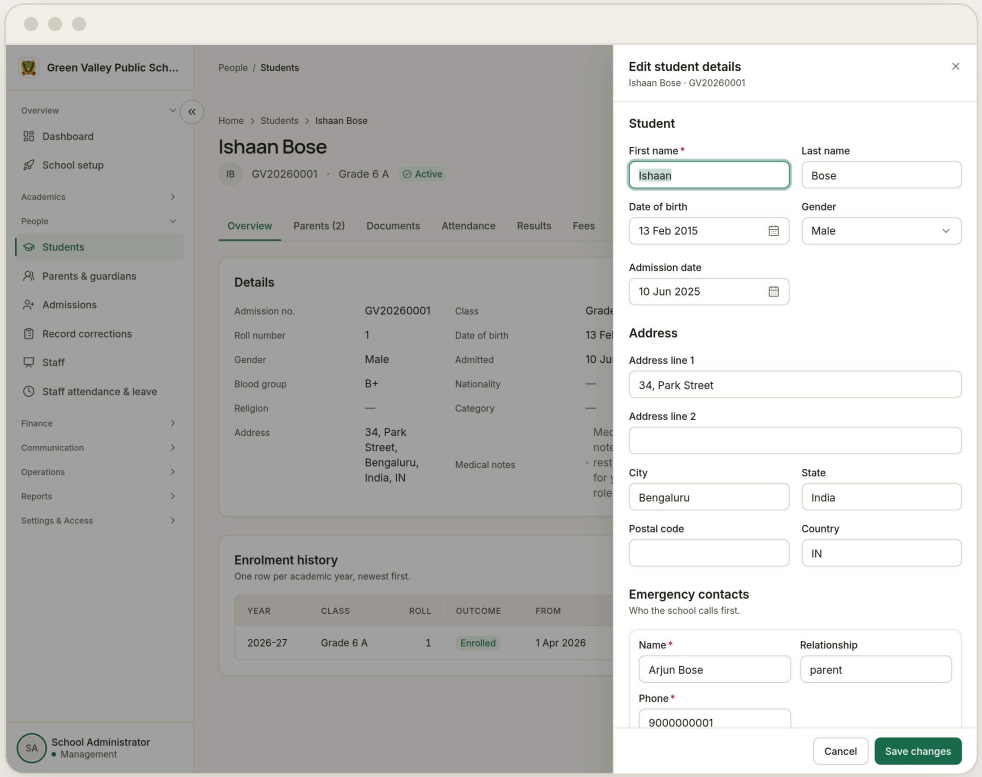

Student profile
Details, emergency contacts, authorised pickup, sign-in and enrolment history in one place.

PEOPLE · EDITING AND IMPORT

Edit in a side sheet, import in bulk

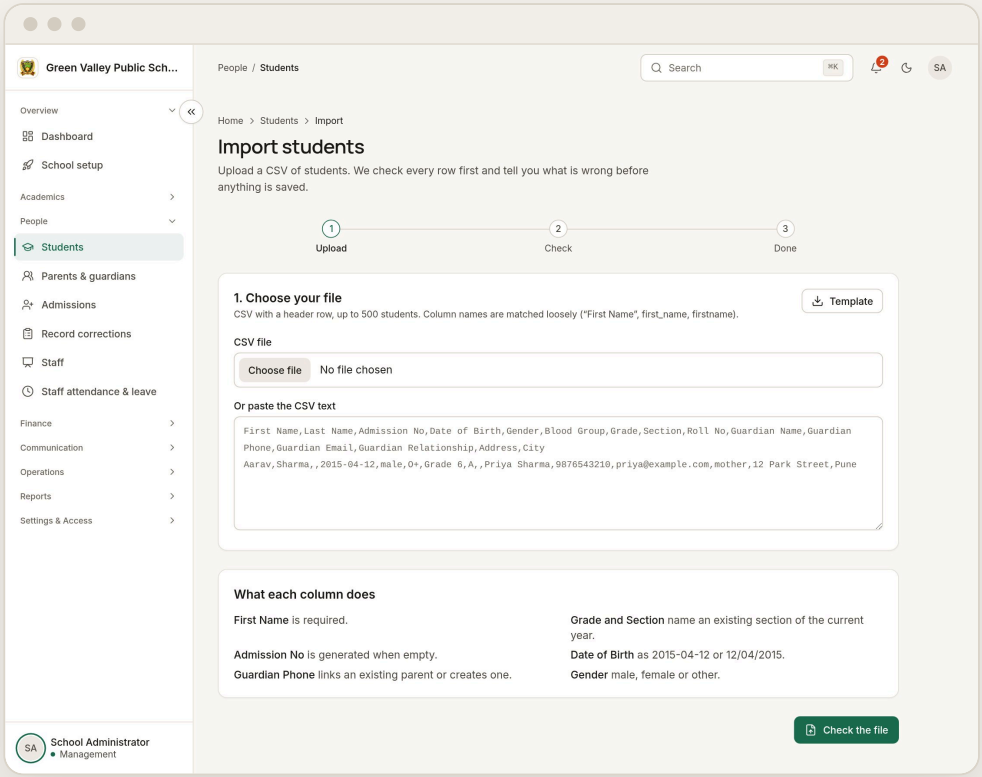

Changes open in a sheet beside the record, so you never lose your place. A CSV import checks every row first and says what is wrong before anything is saved.

- A warning before unsaved changes are lost
- A CSV template, with what each column means
- Seat limits are checked before students are added

Edit student details

Name, dates, address and emergency contacts, with Save and Cancel always in reach.

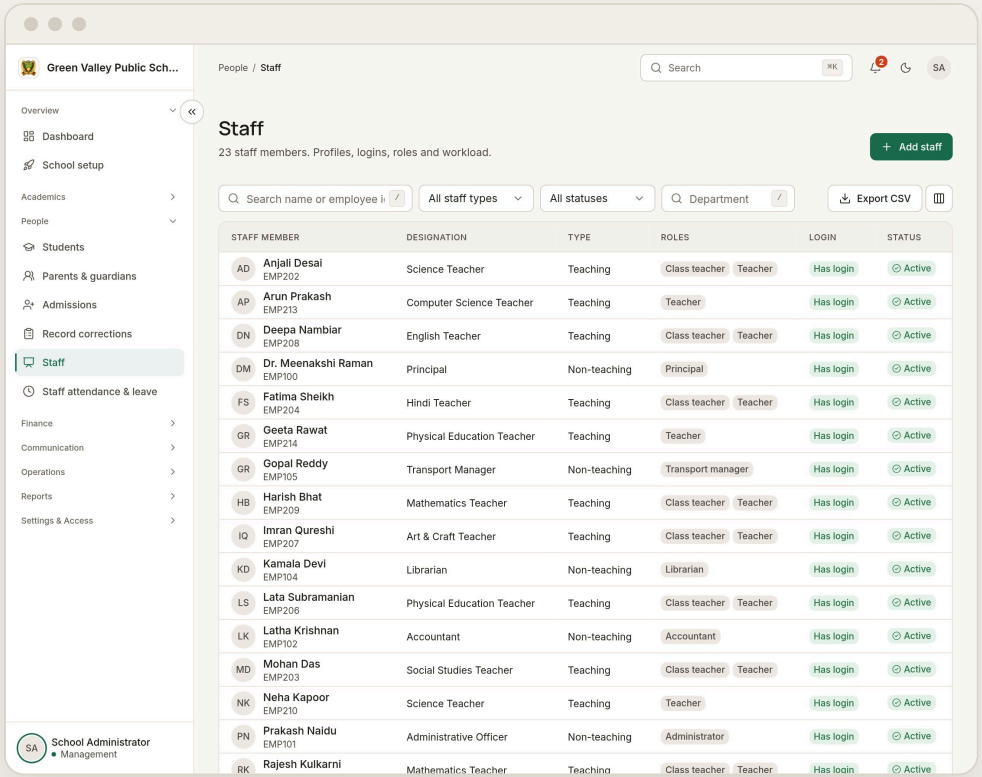

Bulk import

Upload or paste a CSV. Rows are validated first, then imported.

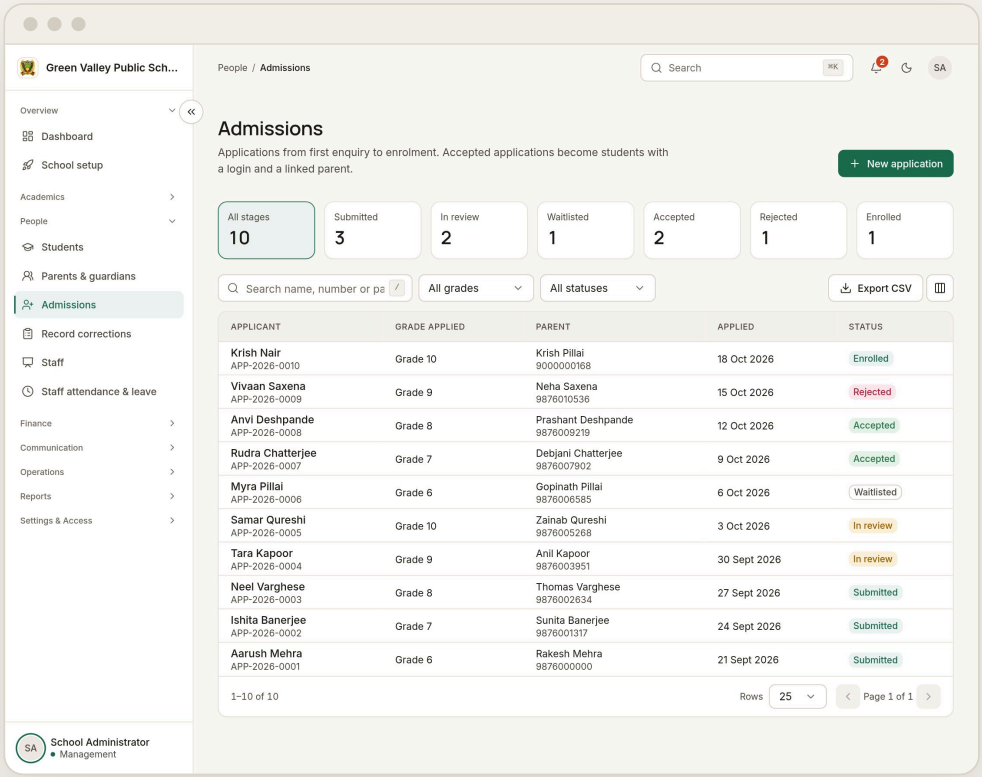

Staff, and applications from enquiry to enrolment

Staff profiles carry roles and sign-in status. Admissions follow an application from first enquiry to enrolment.

- Teaching and non-teaching staff in one directory
- Roles shown against each person
- Stages: submitted, in review, waitlisted, accepted, enrolled

Staff
Designation, type, roles and whether each person has a login.

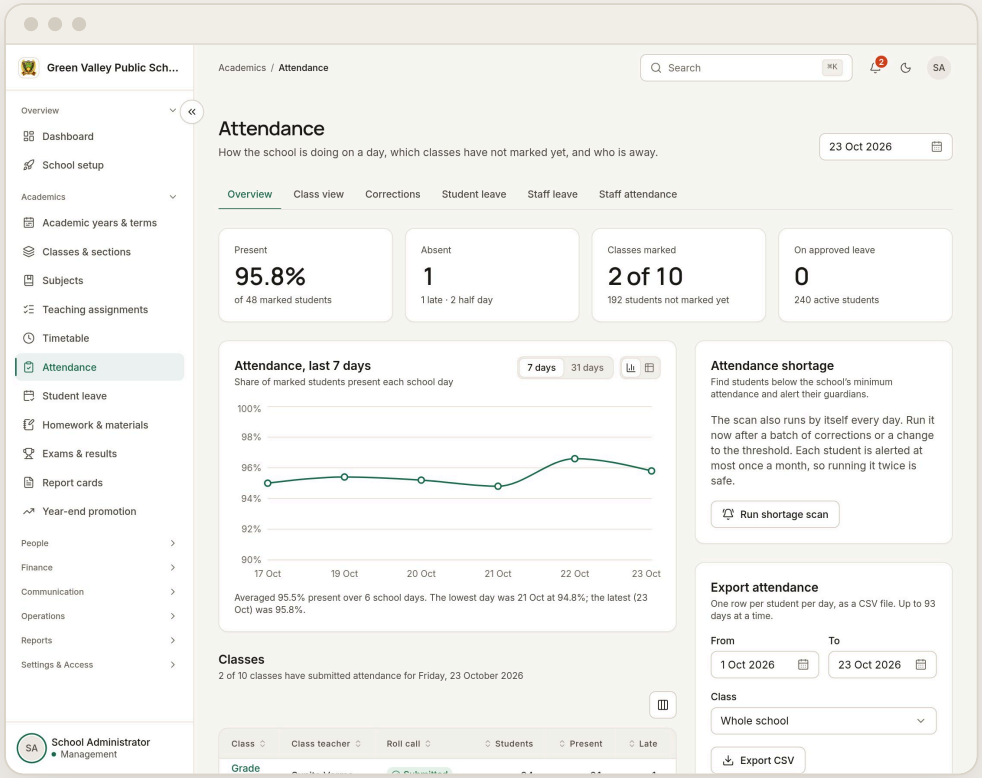

Admissions
Applications by stage, with the parent's contact and the grade applied for.

ATTENDANCE & LEAVE

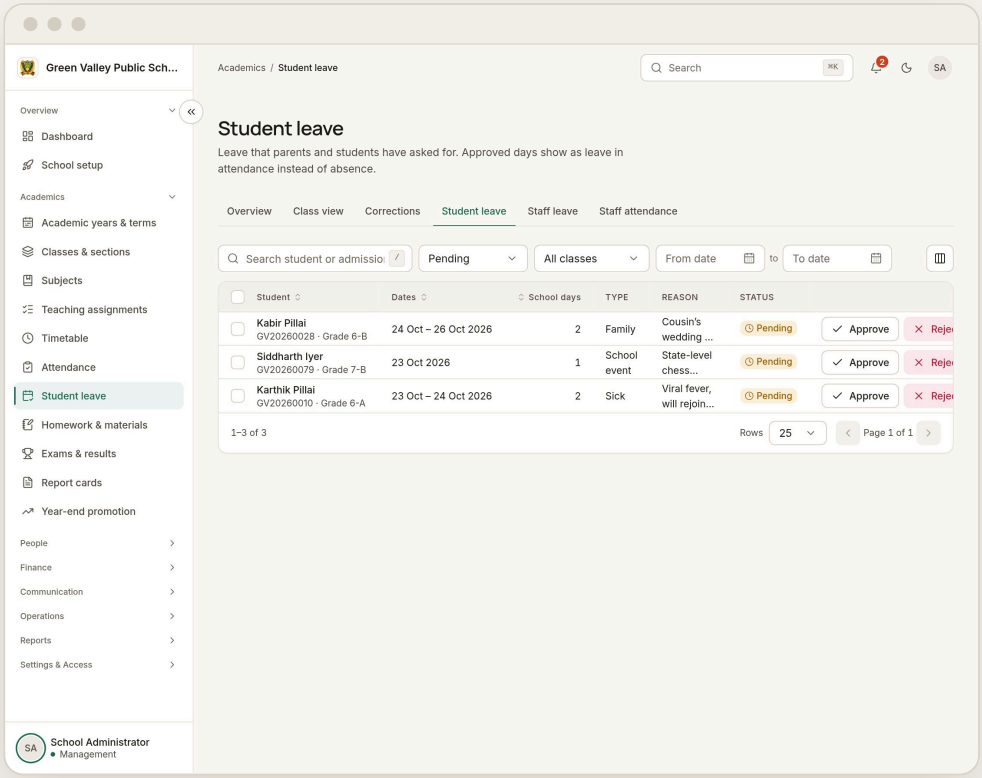

Attendance the whole school can see

Teachers mark attendance in class. Management sees the school's day at a glance, chases classes that have not marked, and decides leave requests.

- Present, absent, late, half-day and on-leave counts
- Seven-day trend and a shortage scan
- Student leave with dates, type and reason
- Corrections and staff attendance in their own tabs

School attendance
Today's numbers, classes still to mark and a trend. The shortage scan and CSV export sit on the same page.

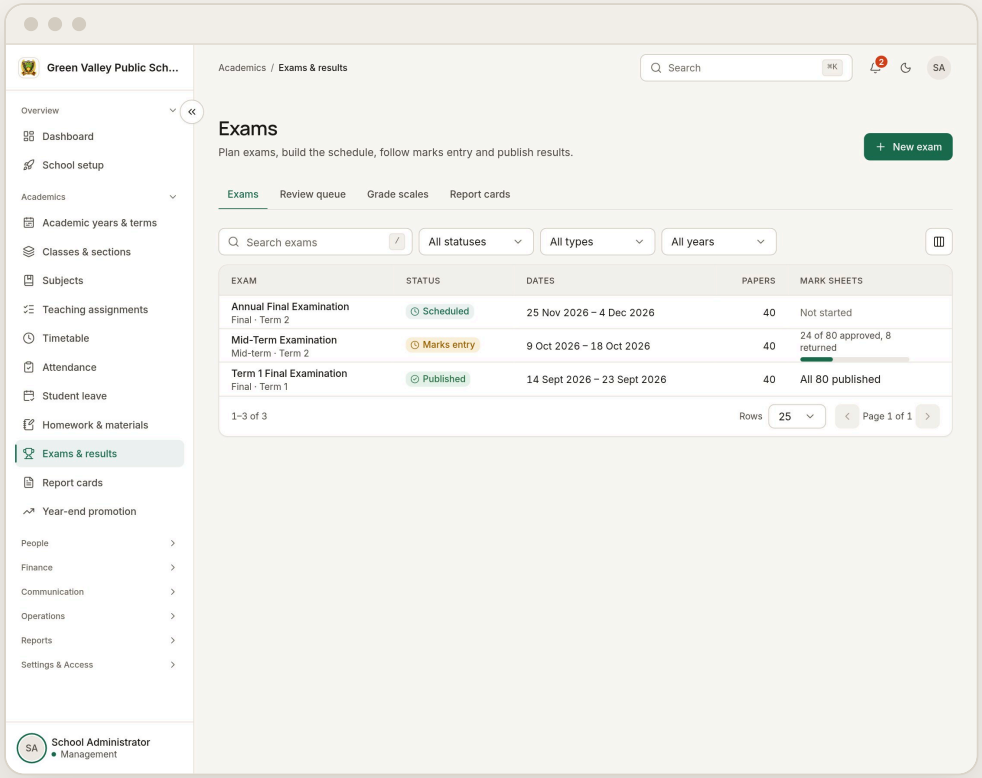

Student leave
Pending requests with dates, type and reason. Approve or reject in a click.

EXAMS & RESULTS

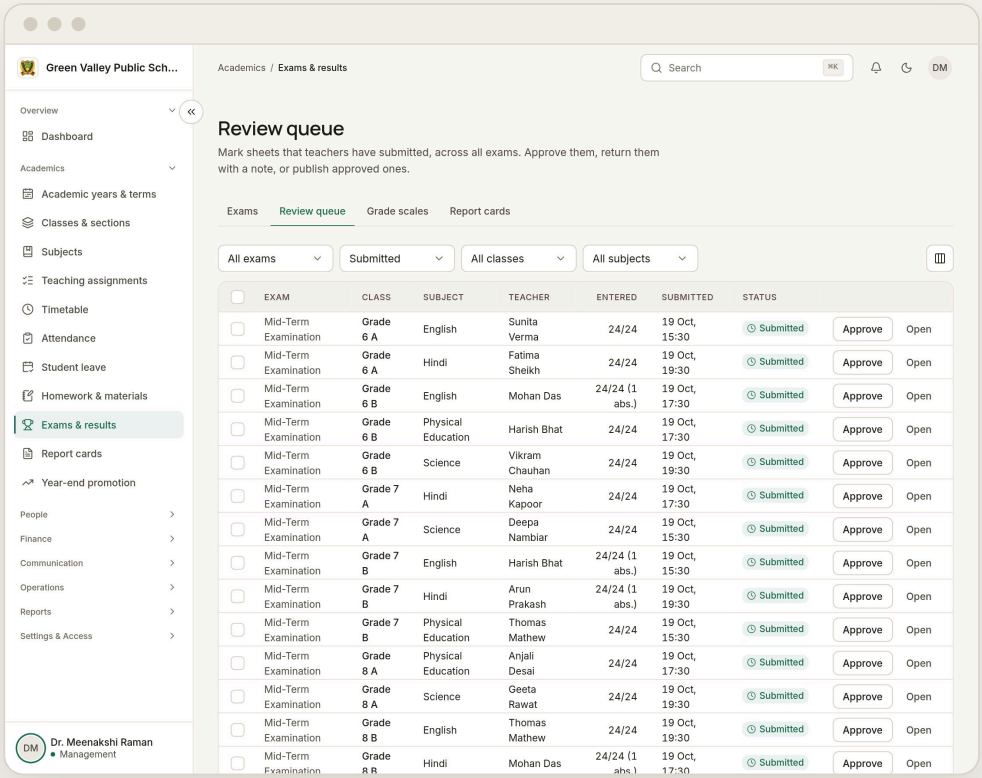

From exam schedule to published result

Plan exams and papers, let teachers enter marks, review the sheets before anything is published, and set the grade scales the school uses.

- Exam status from not started to published
- Teachers submit mark sheets; the principal approves or returns them
- Grade scales and pass marks set by the school

Examinations
Each exam with its dates, papers and how many mark sheets are approved.

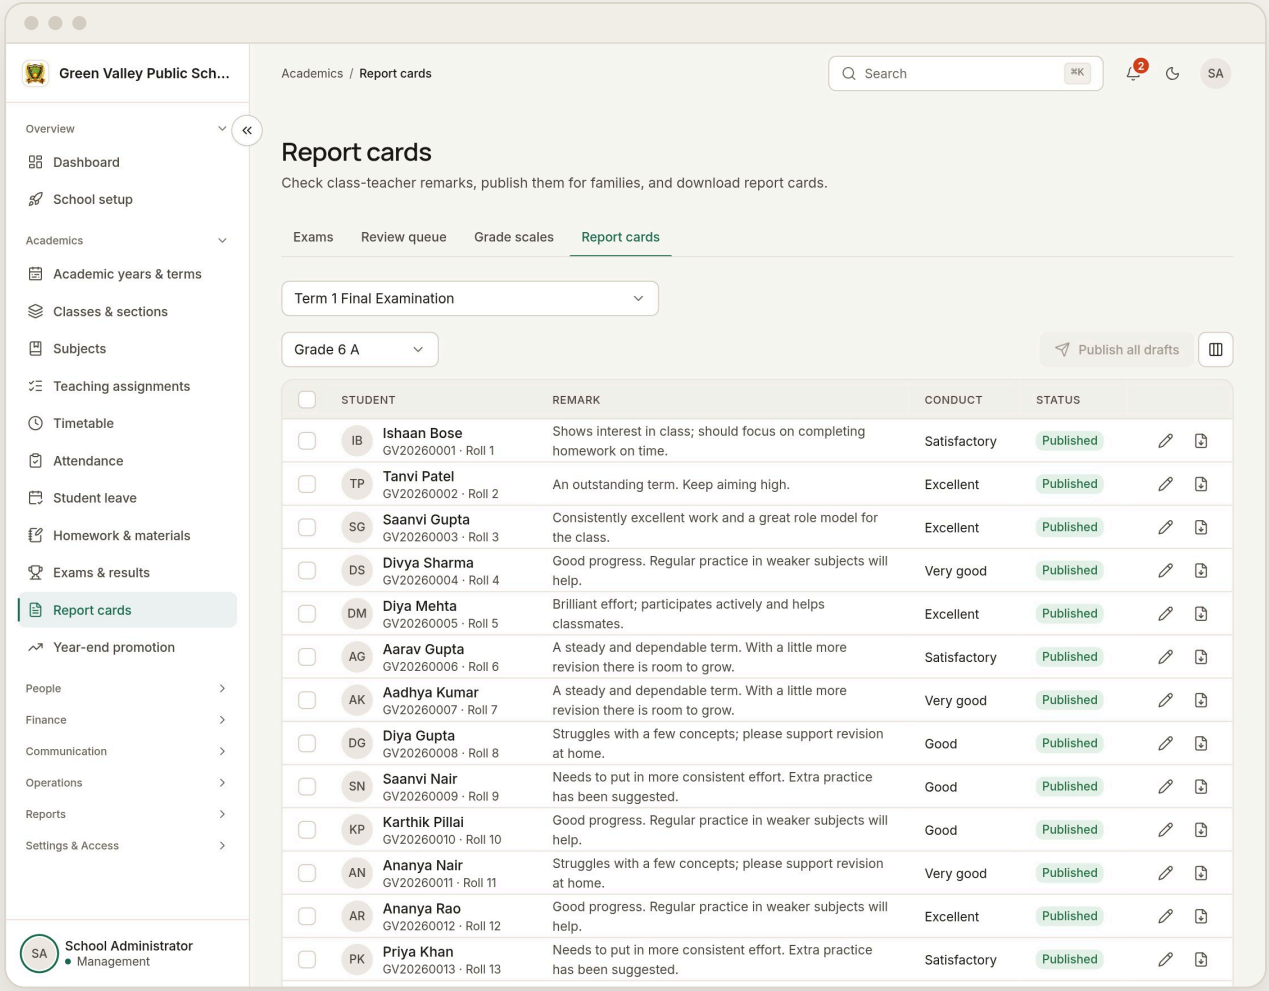

Mark sheet review
Submitted sheets from every class in one queue, with Approve and Open.

EXAMS & RESULTS · REPORT CARDS

Report cards families can open

Class teachers add a remark and a conduct grade for each student. Publish them for the class and families see the result in the app.

- Remarks and conduct per student
- Publish all drafts in one action
- A report card PDF from the student's results

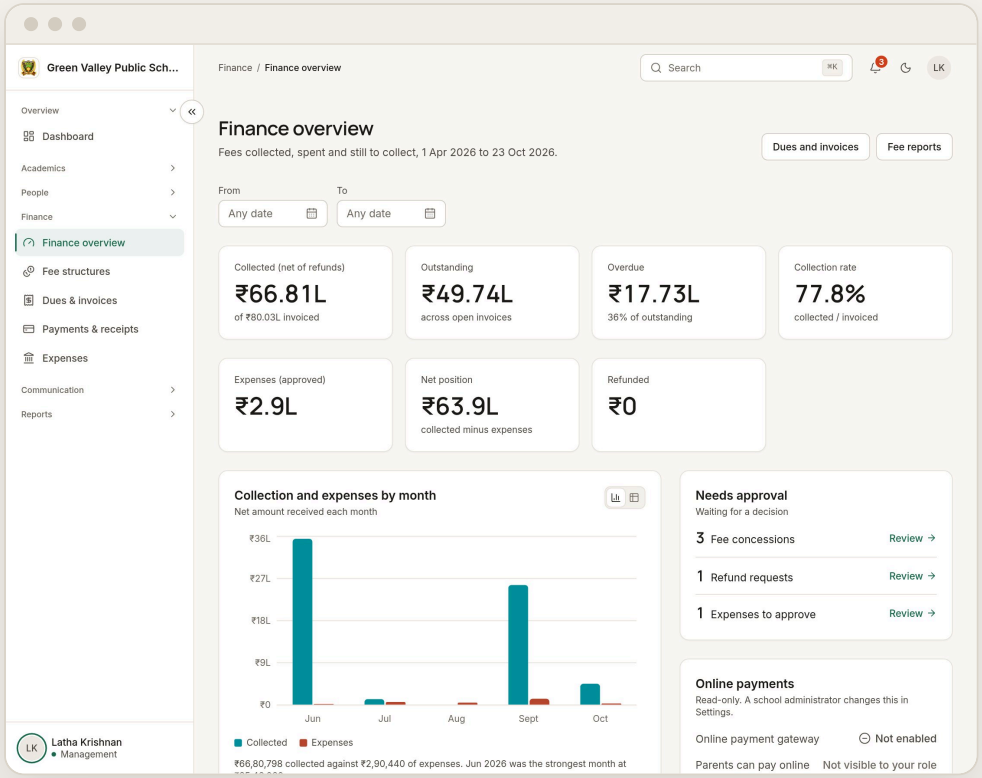

Report cards
Class-teacher remarks and conduct, with Draft or Published status for each student.

FEES & FINANCE

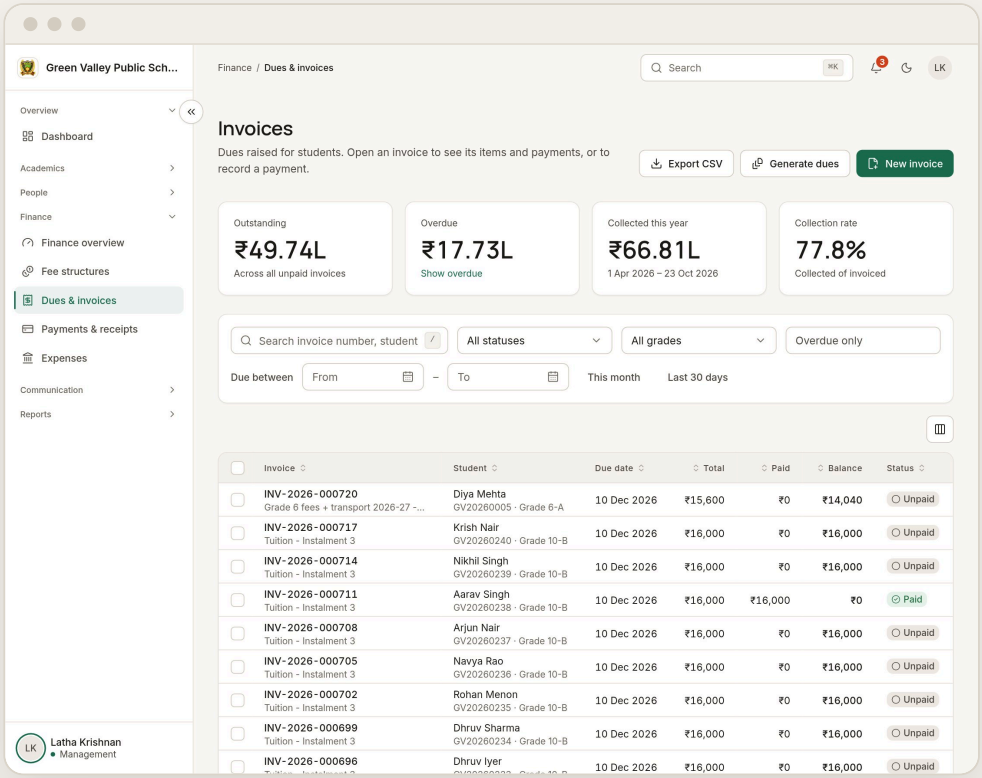

Money in, money out, at a glance

The finance overview sets what was collected against what was spent, and shows what is outstanding and overdue. Invoices are raised per student and tracked until paid.

- Collection rate and net position
- Filter invoices by status, grade and due date
- Generate dues from fee structures in one go
- Export to CSV

Finance overview
Collected, outstanding, overdue, collection rate, expenses and refunds, with a monthly chart.

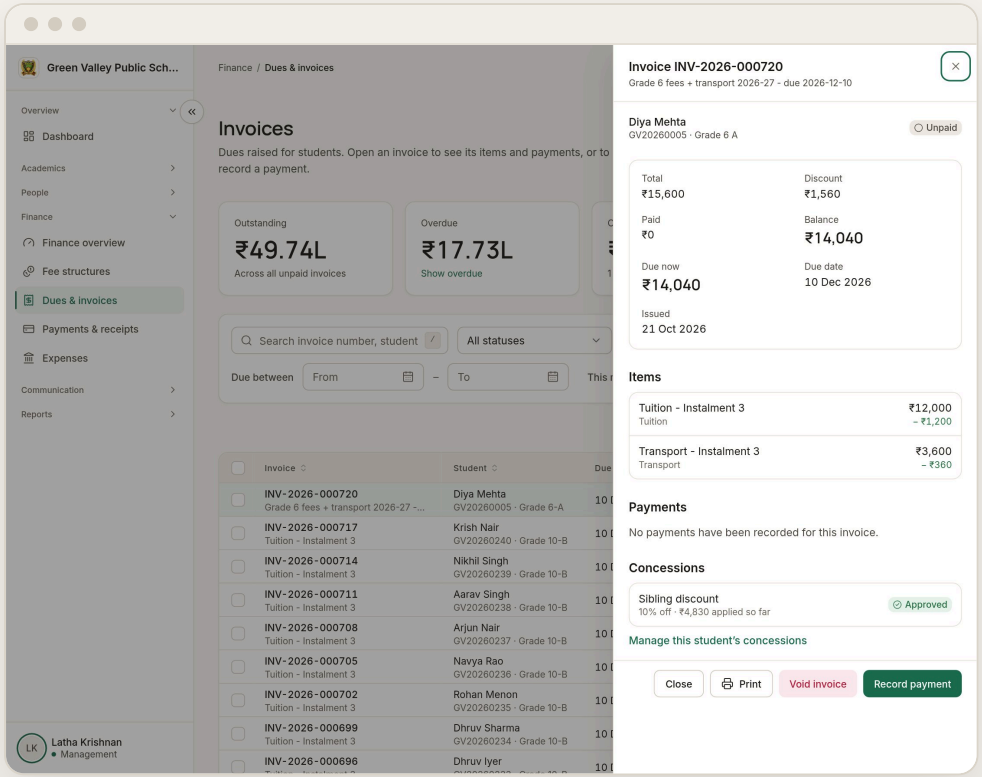

Invoices
Every invoice with amount, paid, balance and status. Generate dues or raise a new invoice.

FEES & FINANCE · INVOICES AND SETUP

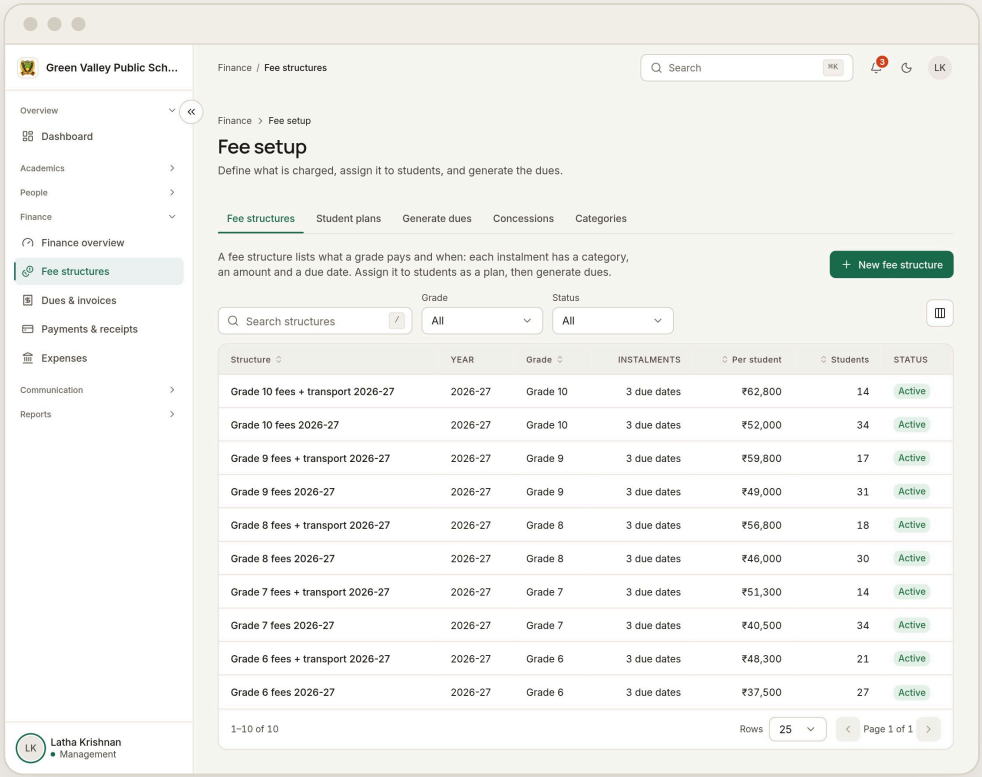

Open an invoice, see everything

An invoice opens in a side panel with its items, concessions and payments, and the actions that matter: record a payment, print, or void.

- Fee structures per grade, with instalments and due dates
- Student plans and concessions, with approval
- Receipts on request

Invoice detail
Items, discounts, payments and balance, with Record payment and Print.

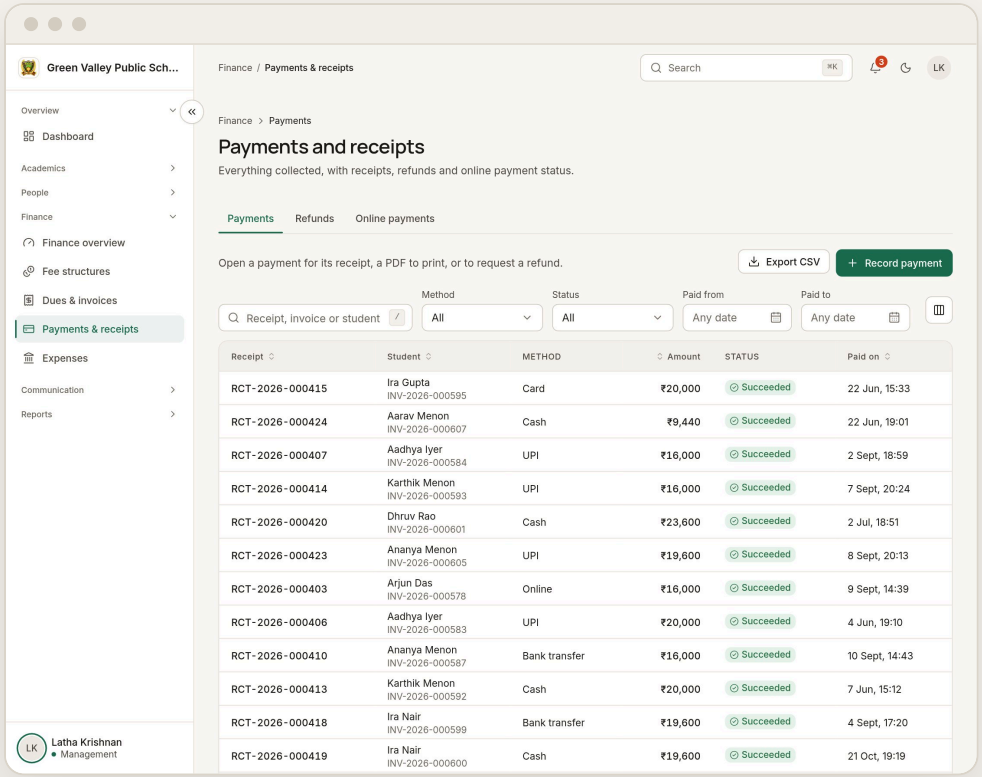

Fee setup
Structures by grade with instalments. Plans, dues, concessions and categories are in neighbouring tabs.

FEES & FINANCE · PAYMENTS AND DUES

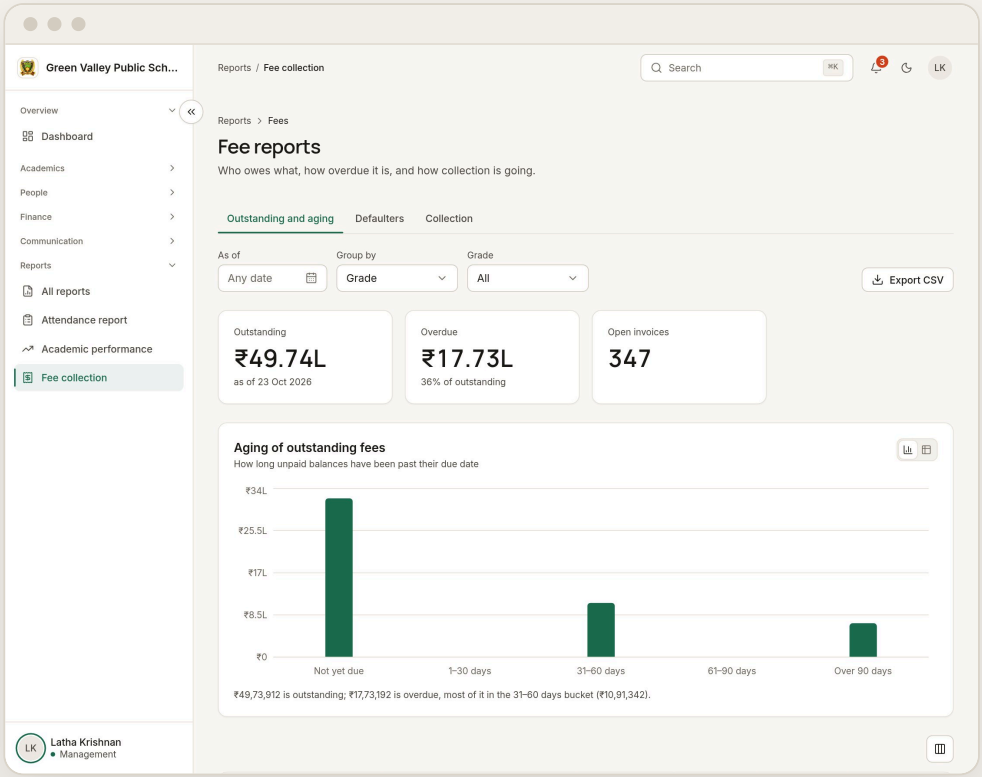

Payments, receipts and defaulters

Every payment carries a receipt number and a method. Fee reports show who owes what, how old the dues are and how collection is going.

- Cash, card, UPI and online payments
- Refunds and online payments in their own tabs
- Ageing buckets and a defaulters list for follow-up

Payments and receipts
Receipt, student, method, amount and status, filterable by date and method.

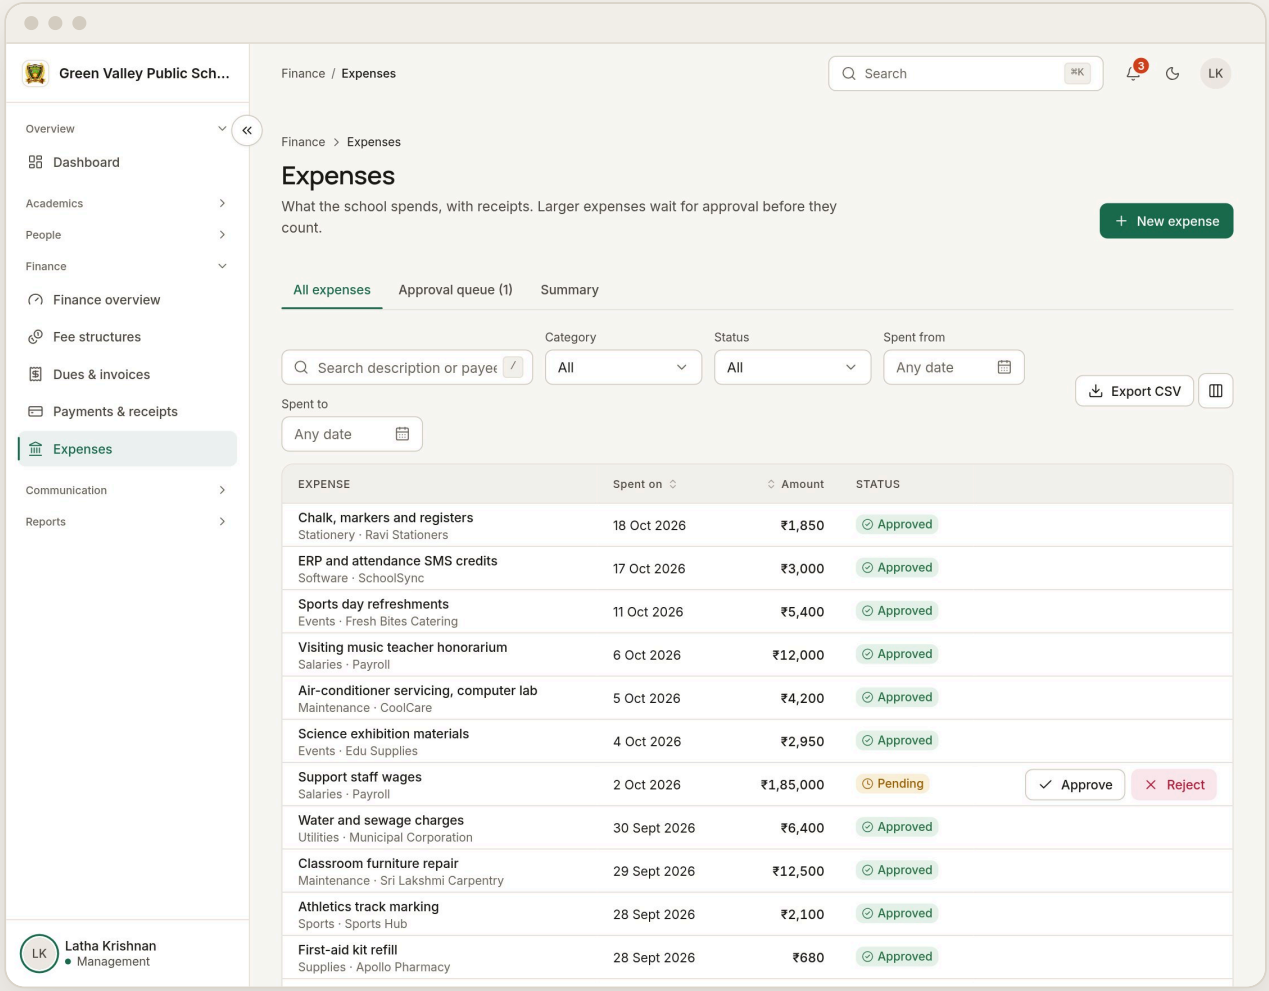

Outstanding and ageing
How long unpaid balances have been due. Defaulters and collection reports are in the tabs.

FEES & FINANCE · EXPENSES

Expenses with approvals

Record what the school spends, with receipts. Larger expenses wait for approval before they count.

- An approval queue for larger expenses
- A summary by month and category
- Export to CSV

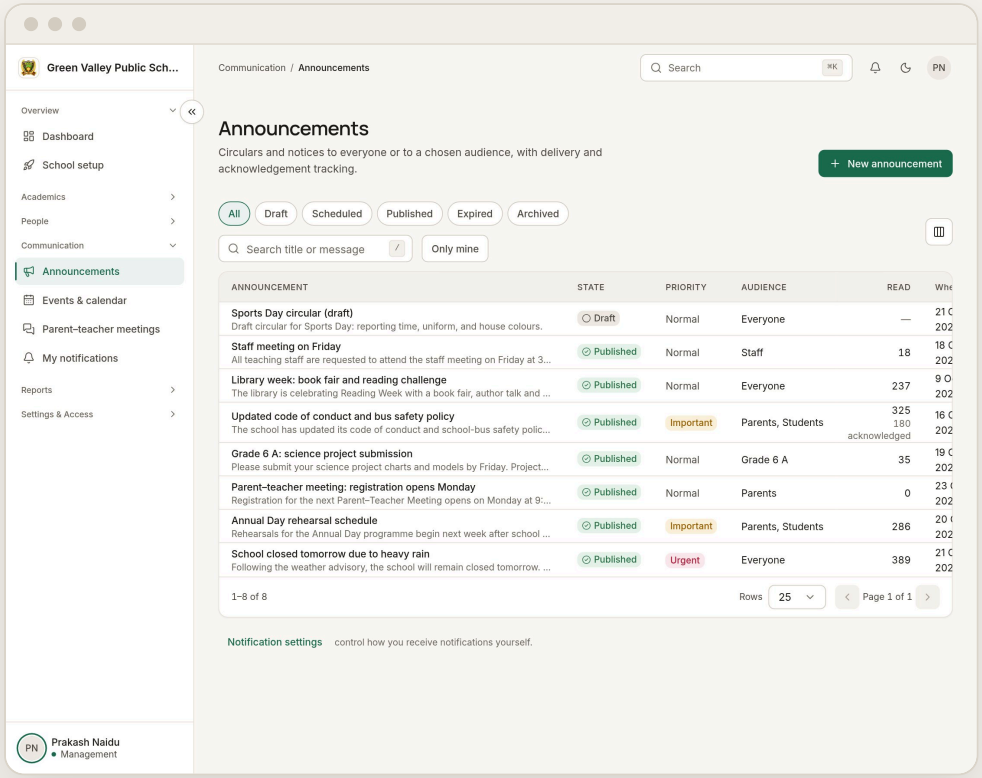

Expenses
Spend by category and date, with Approved or Pending status.

COMMUNICATION

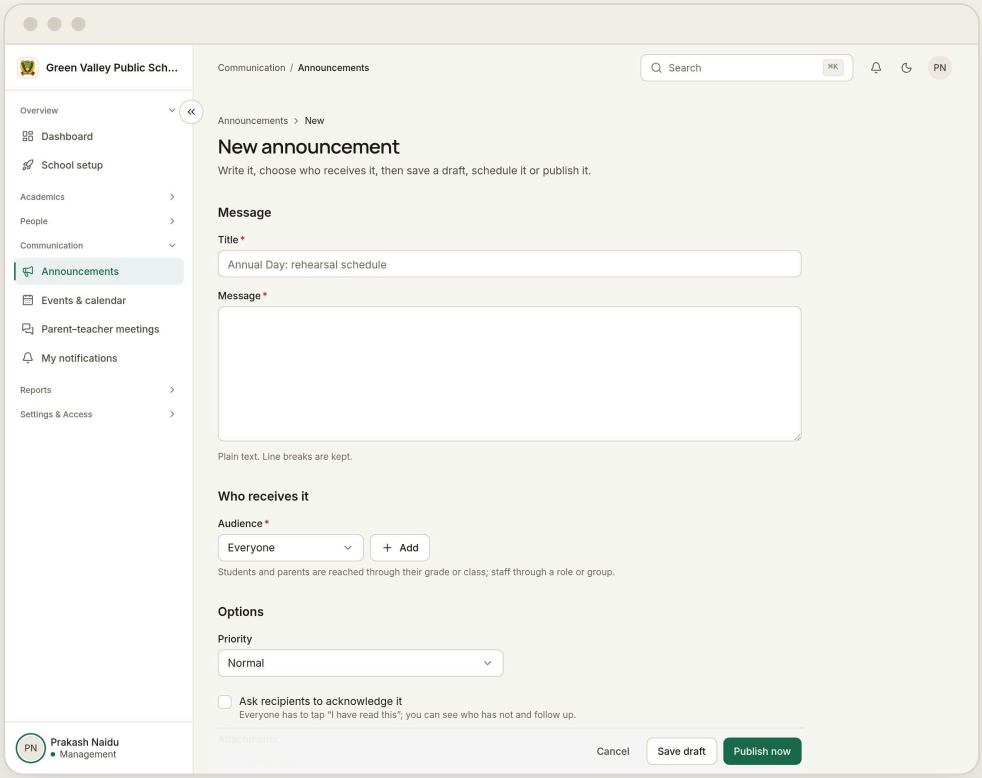

Announcements that reach the right people

Write once, choose who should receive it, then publish now or save a draft. Delivery and read status are tracked for every announcement.

- Audience: everyone, a role, a grade or a section
- Priority: normal, important or urgent
- Read counts and acknowledgements
- Push and e-mail, with quiet hours

Announcements
Draft, scheduled, published, expired and archived, with audience, read counts and acknowledgements.

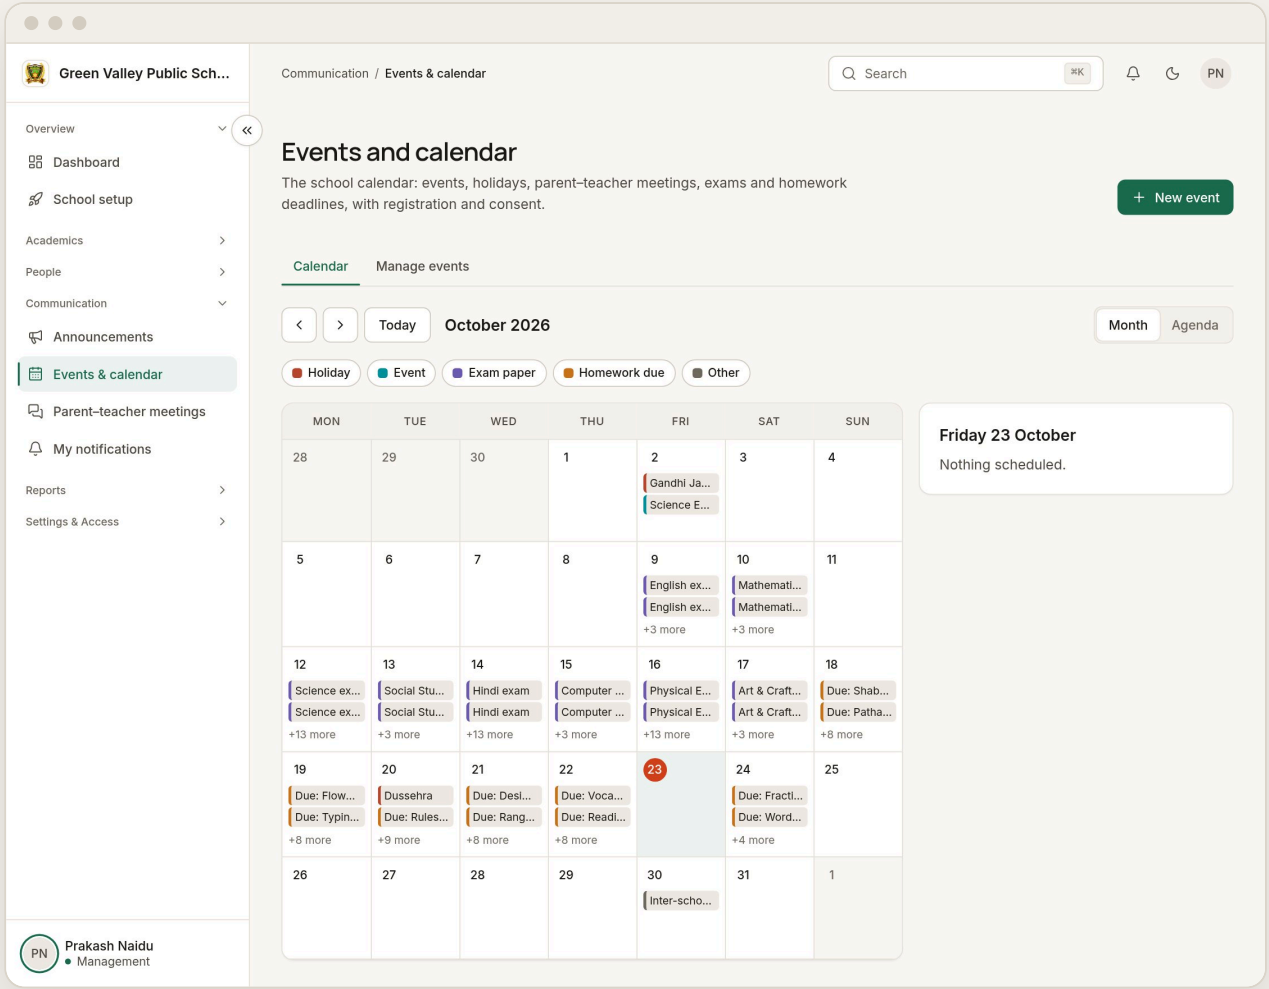

Compose
Title, message and audience. Save a draft or publish.

COMMUNICATION · CALENDAR

One calendar for the whole school

Holidays, events, exams, homework deadlines and parent–teacher meetings share one calendar, in month and agenda views.

- Colour-coded by type
- Registration and consent on events
- Parent–teacher meetings alongside

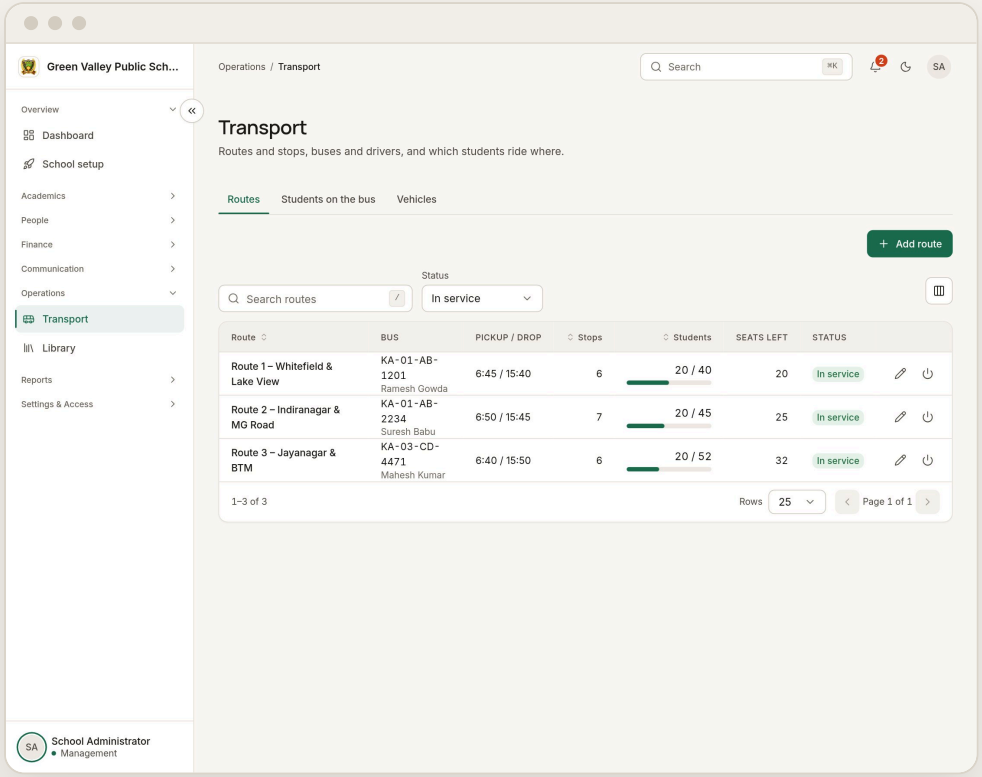

Events and calendar
Month view with Holiday, Event, Exam paper, Homework due and Other categories.

OPERATIONS

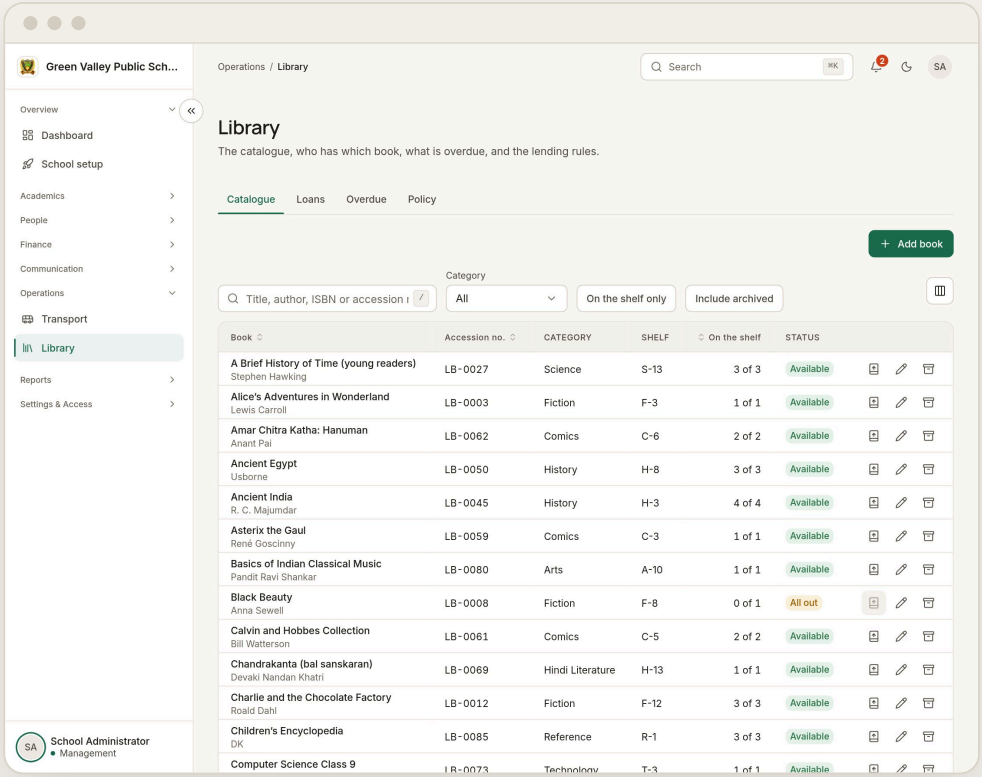

Transport and library

Routes, stops and buses with seat counts, and a library catalogue with issue, return and overdue tracking.

- Seats left on each route
- Students allocated to each bus
- Availability, shelf and category for every book
- Loans, overdue items and lending rules

Transport
Routes with bus, pickup and drop times, stops and how many seats are taken.

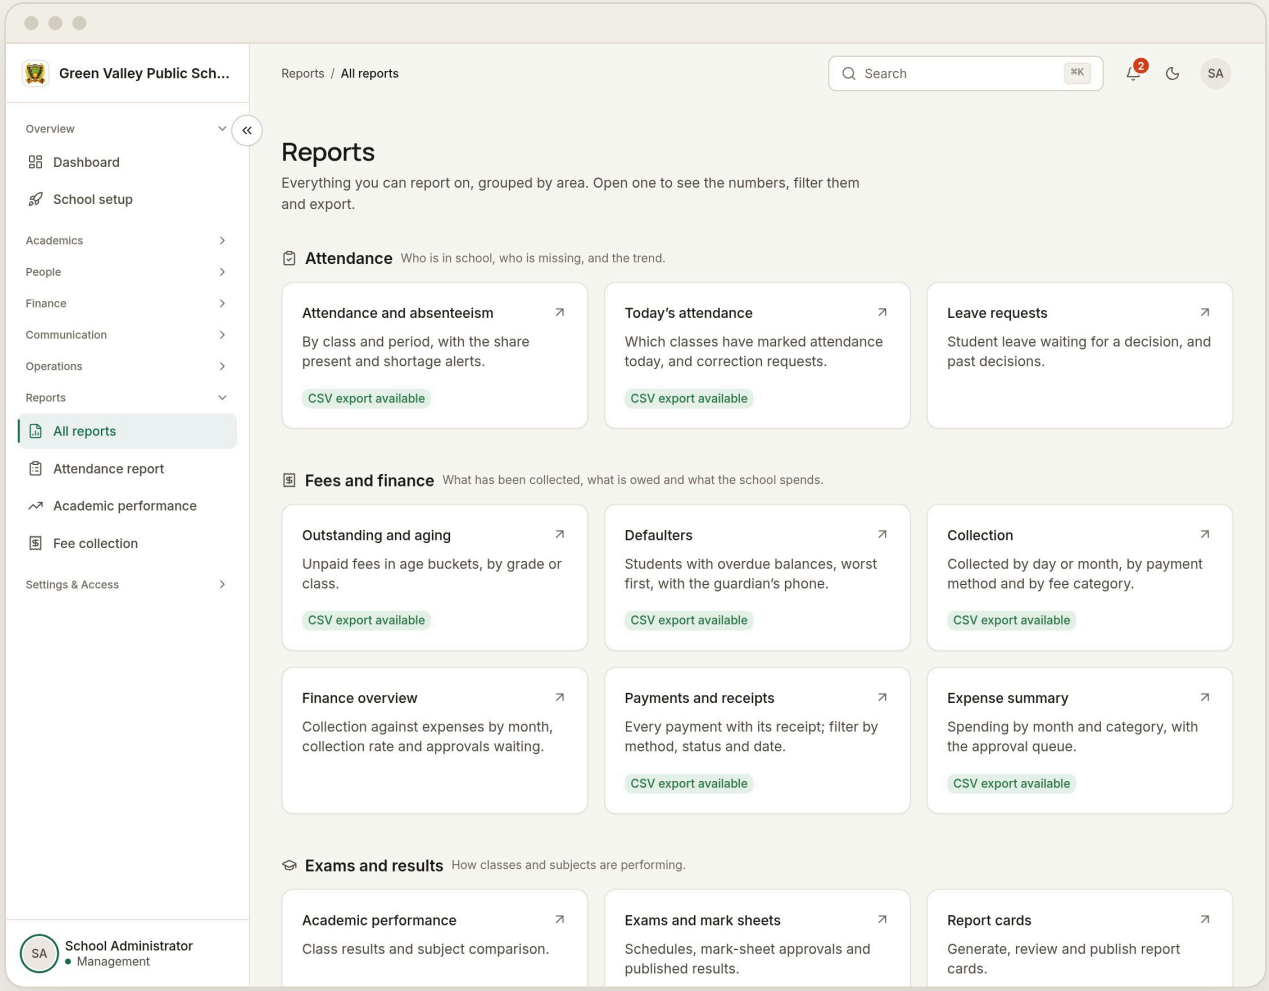

Library
The catalogue with availability. Loans, overdue and policy have their own tabs.

OPERATIONS · REPORTS

Reports, grouped by the question they answer

Attendance, fees and academics are laid out by what you want to know, not by table. Open a report to filter it, and export it where a CSV is offered.

- Attendance, leave and absenteeism
- Outstanding fees, defaulters and collection
- Expense summary
- CSV export on most reports

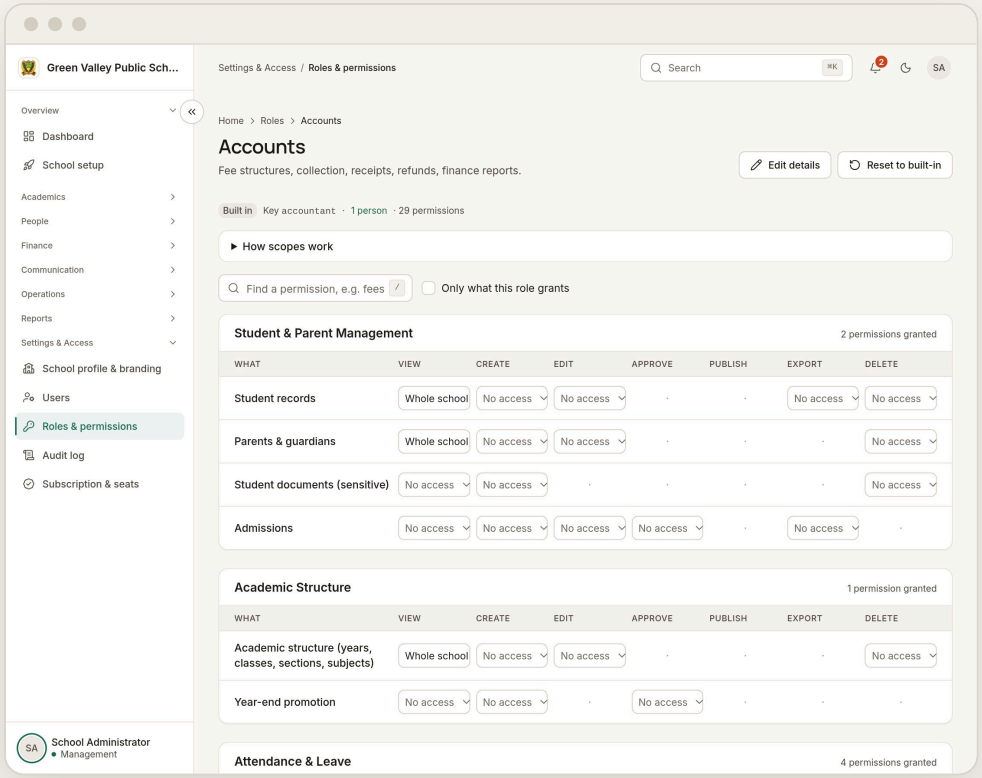

Reports hub
Each card says what the report answers and whether a CSV export is available.

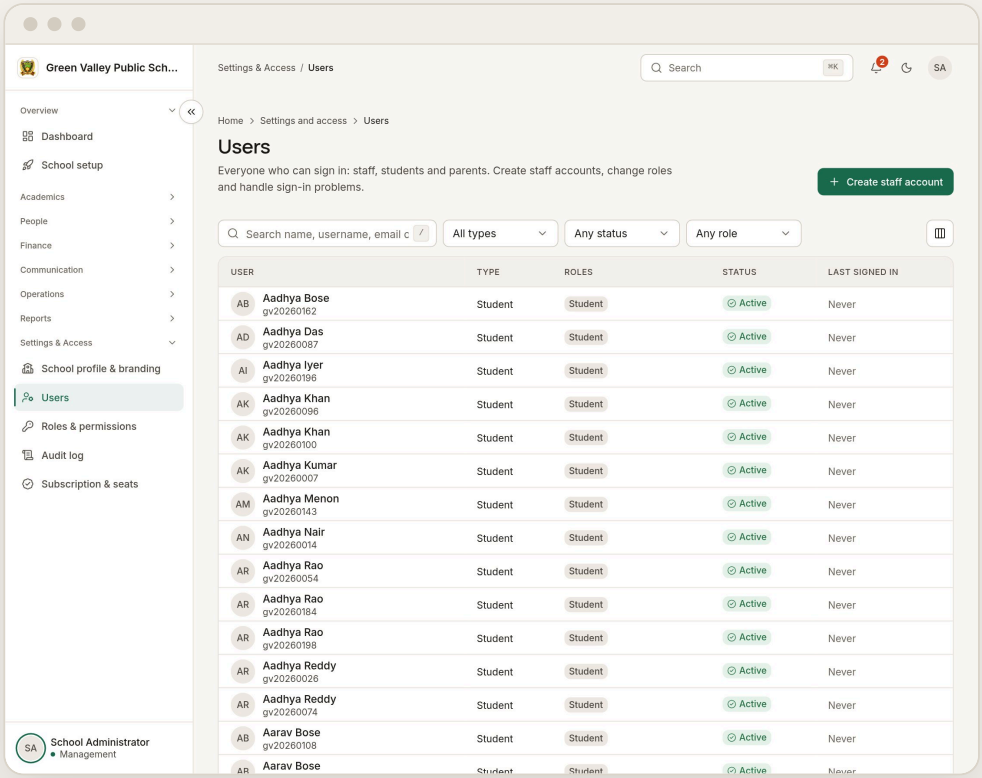

Who can do what, set by the school

Every role is a list of actions on records, each limited to a scope: own, linked children, assigned classes, or the whole school. Start from the built-in roles and adjust.

- Built-in roles for principal, administrator, accountant, office and more
- Scope: own, linked, assigned, school
- Actions: view, create, edit, approve, publish, export, delete
- Reset any role to its built-in setting

Roles and permissions
A matrix of modules by action, with a scope picker on each row.

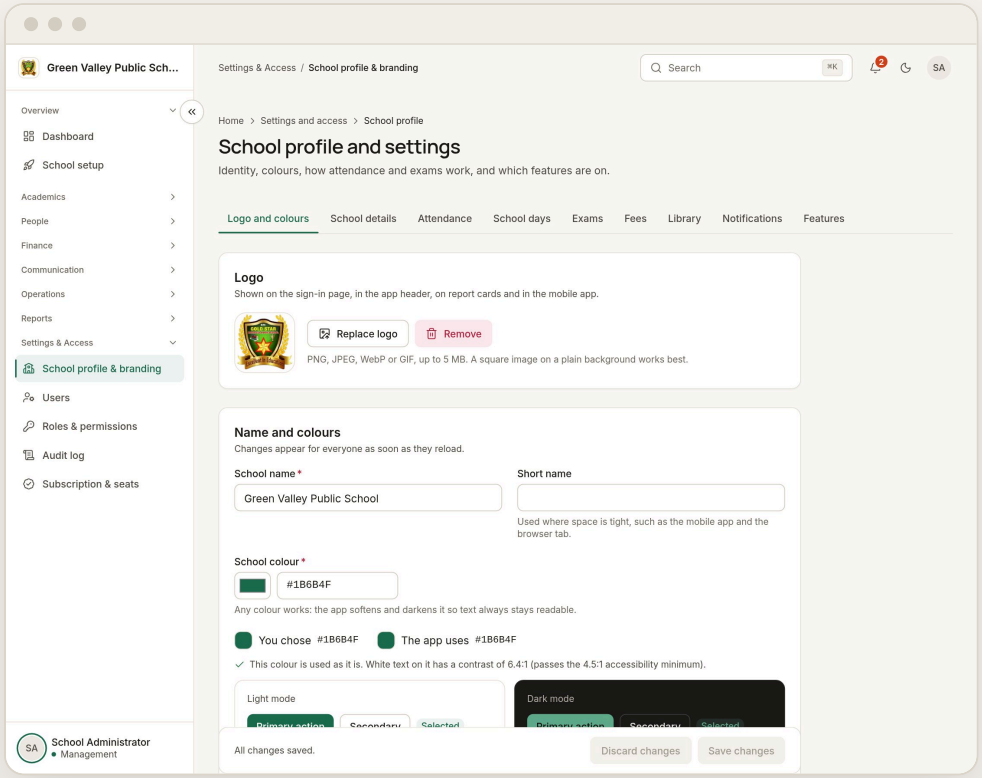

User accounts
Everyone who can sign in: staff, students and parents, with role and last sign-in.

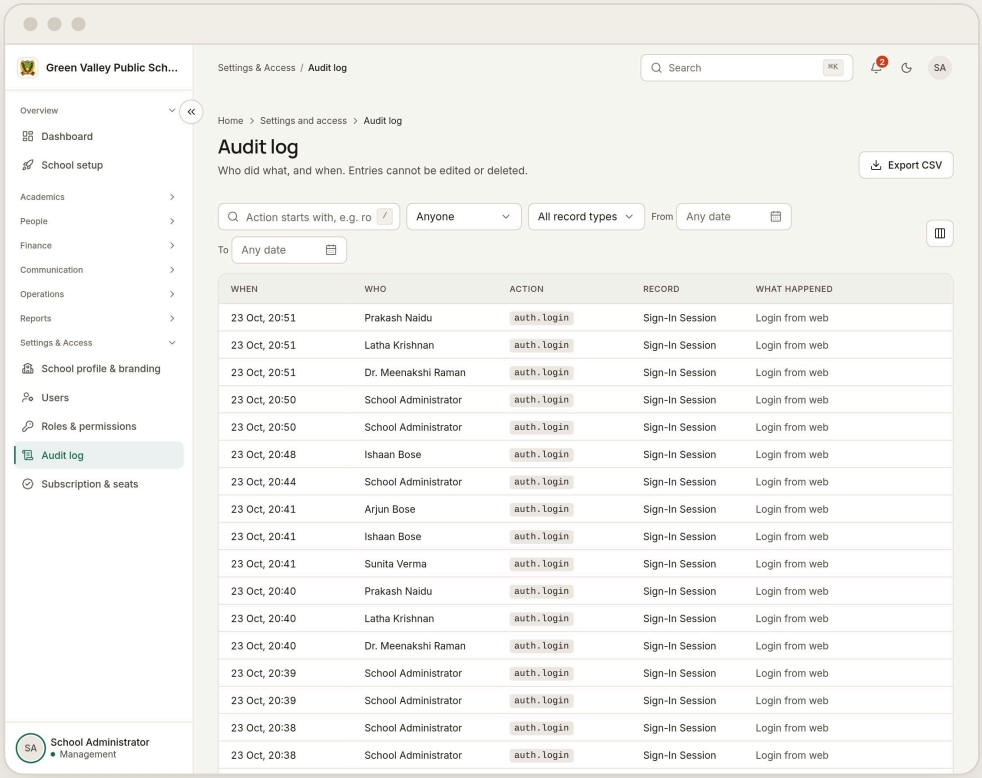

The school's identity, and a record of what happens

Logo, name and colour make the app the school's own. The audit log shows who did what and when; entries cannot be edited or deleted.

- The school colour is softened automatically so text stays readable
- Sign-ins and sensitive actions are logged
- Tabs for attendance, school days, exams, fees, library, notifications and features

School profile and branding
Logo, name and school colour, with tabs for the school's rules.

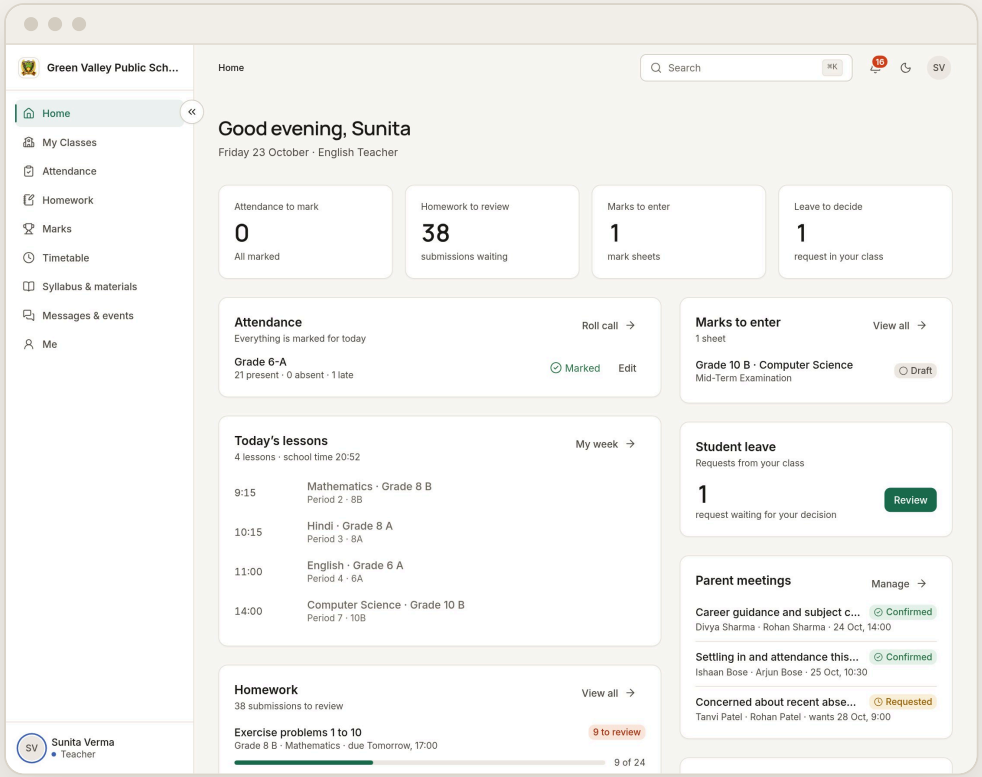

Audit log
Who, what, where and when, filterable and exportable to CSV.

TEACHERS · WEB

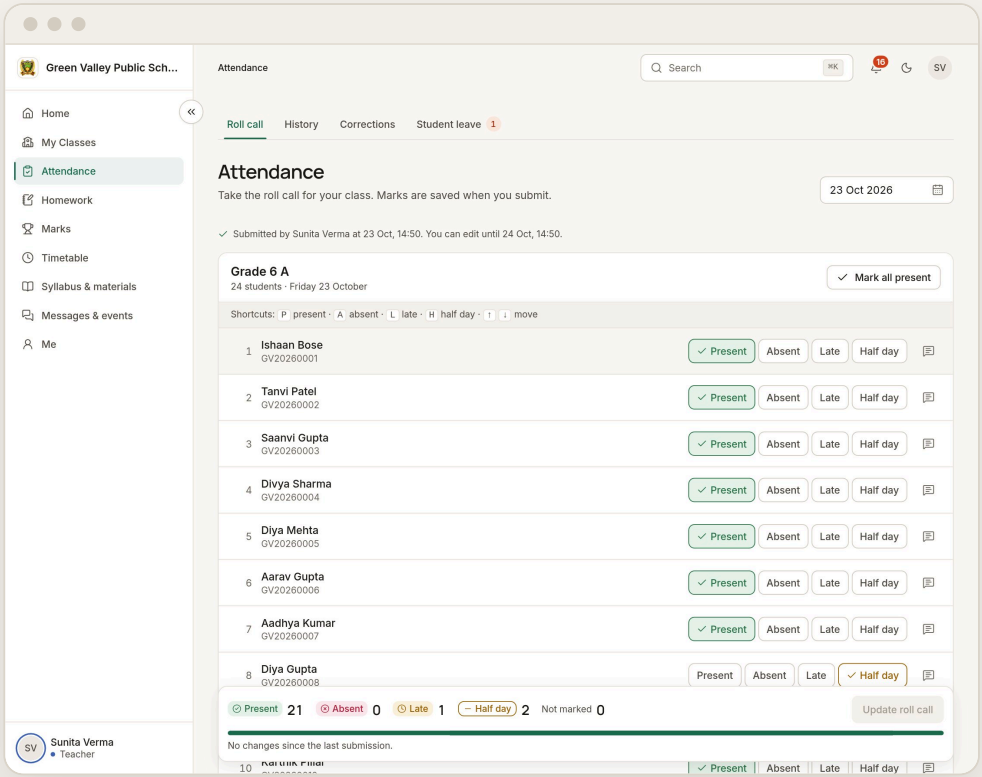

A home built for the school day

Teachers open on today: attendance still to mark, homework to review, marks to enter and requests waiting. They see only the classes they teach.

- Today’s lessons with period and room
- Leave requests and parent meetings waiting
- Roll call in a few taps

Teacher home
What needs doing today, the day’s lessons and requests waiting.

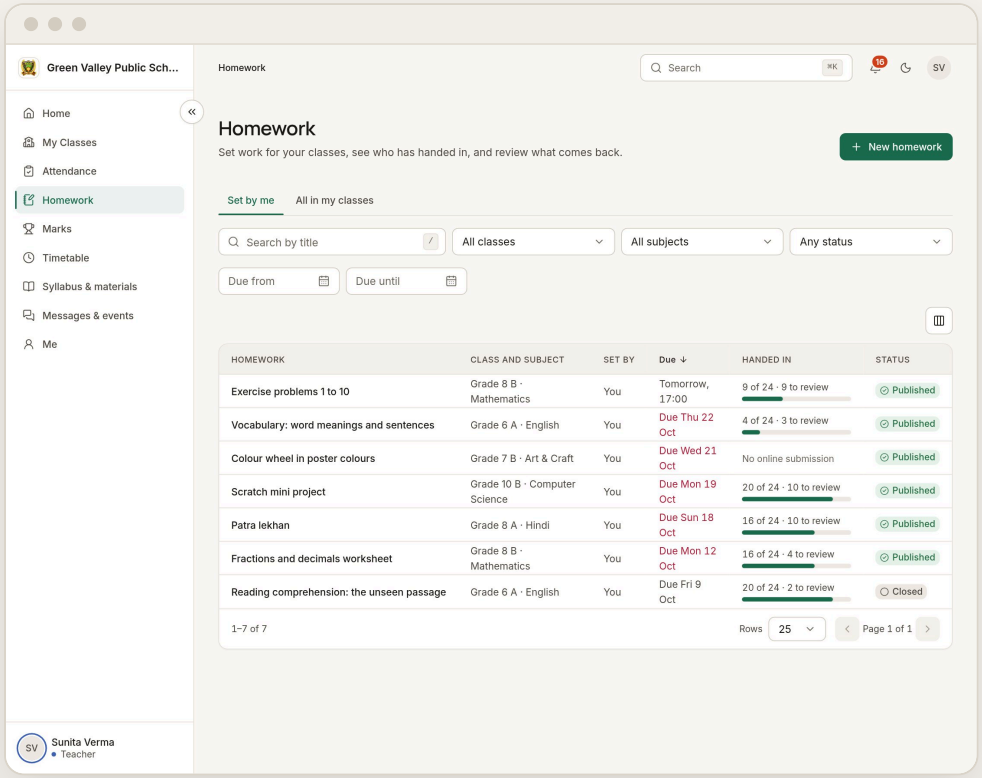

Roll call
Present, absent, late or half-day for each student, with keyboard shortcuts and Mark all present.

TEACHERS · WEB

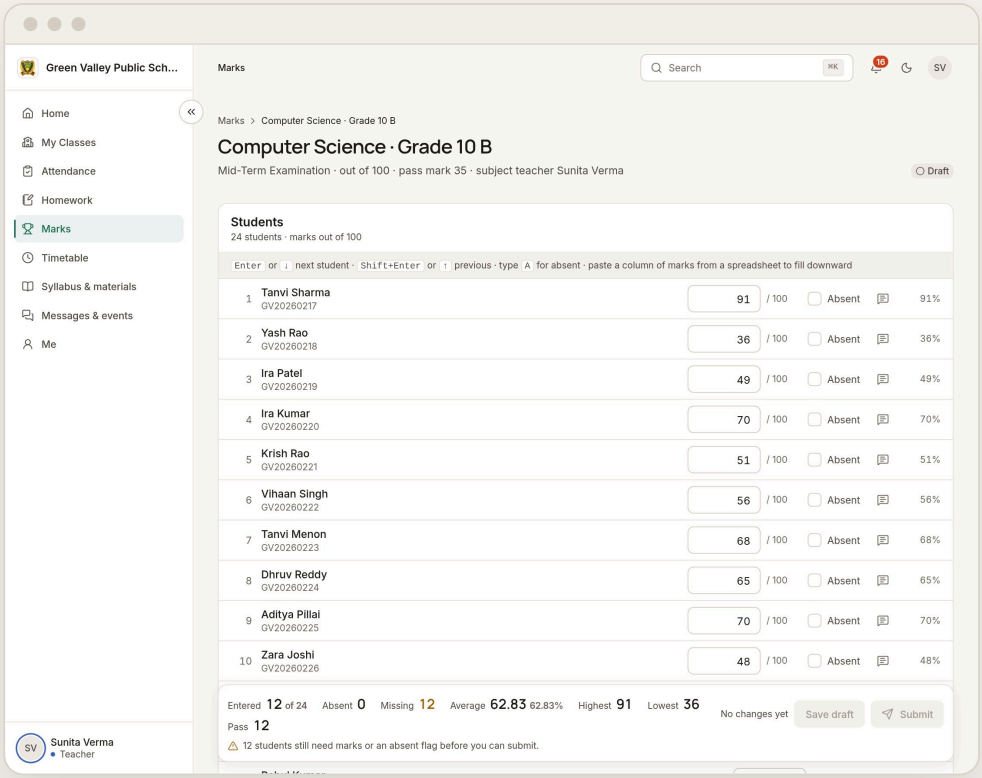

Homework and marks, without the paperwork

Set homework for a class, see who has handed in and review the work. Enter marks per student against a mark sheet and submit it for approval.

- Hand-in progress on every task
- Marks entry with absent flags and running totals
- A draft is kept until you submit

Homework
Set by me, or all homework in my classes, with hand-in progress.

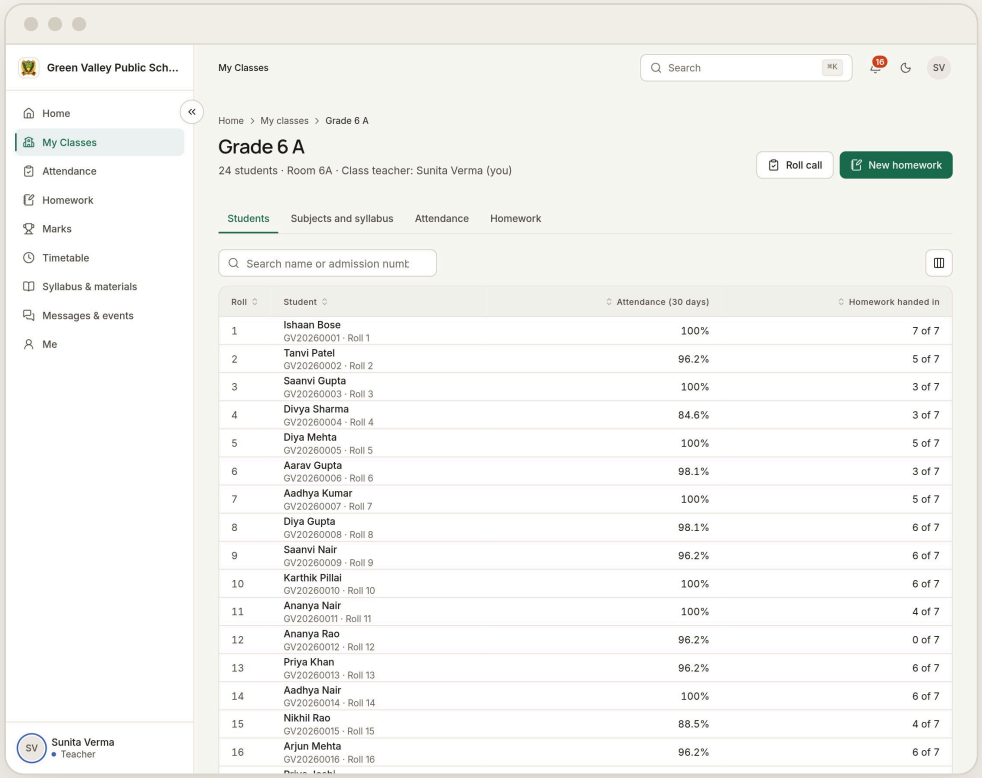

Marks entry
One field per student, with average, highest and lowest shown as you type.

TEACHERS · WEB

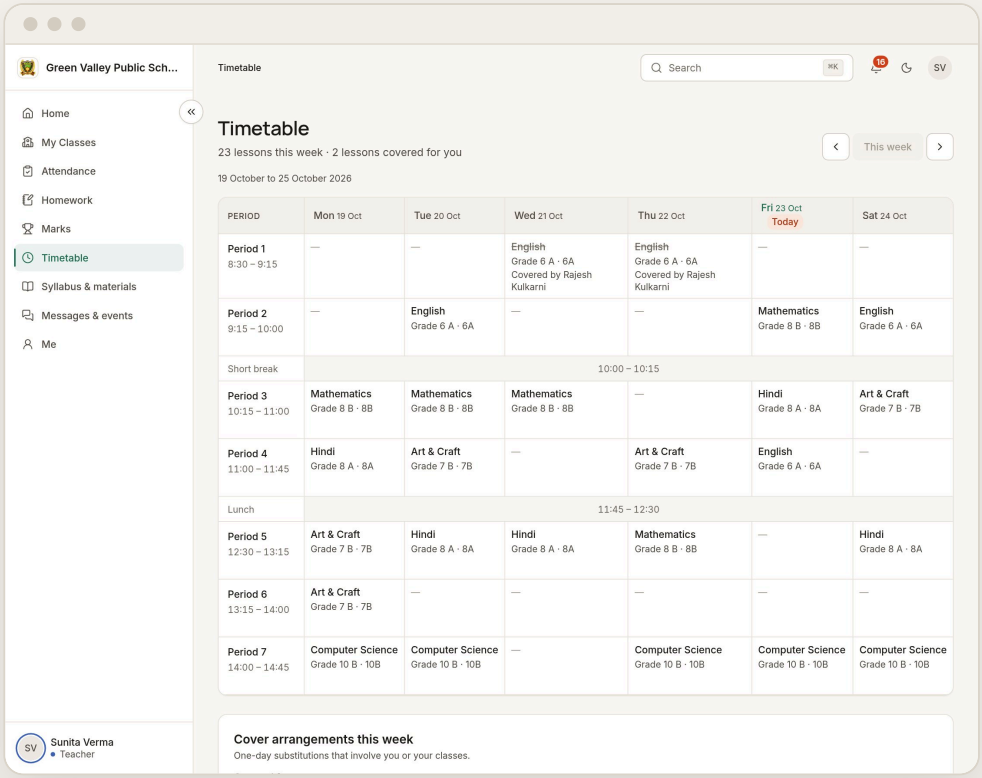

My classes and my week

Class pages show each student’s attendance and homework record. The timetable shows the week’s lessons, including any cover for a colleague.

- Subjects and syllabus progress for each class
- Attendance and homework history per student

Class overview
Students with attendance over 30 days and homework handed in.

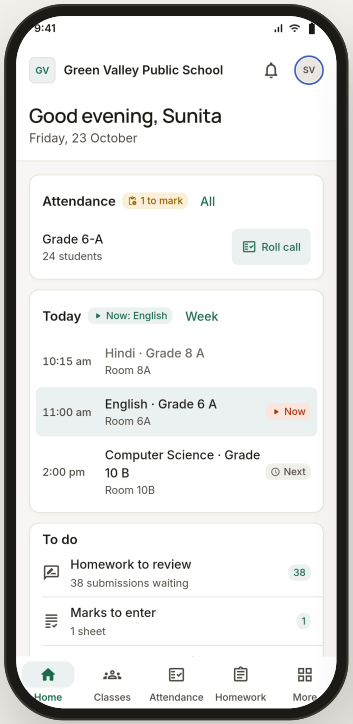

My timetable
The week’s lessons, with covers marked.

TEACHERS · MOBILE

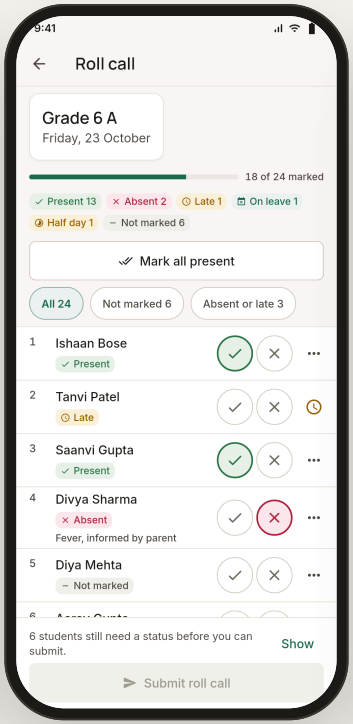

The teacher's day, in a pocket

Roll call, homework and marks are what teachers do most. On the phone each one is a short, thumb-friendly flow.

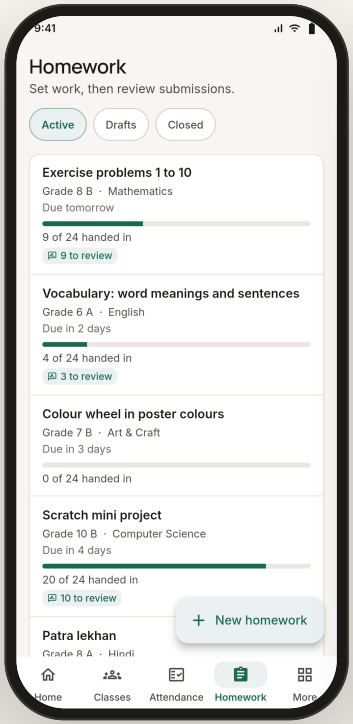

- Mark everyone present, then change the exceptions
- See hand-in progress at a glance
- Save marks as a draft, submit when done

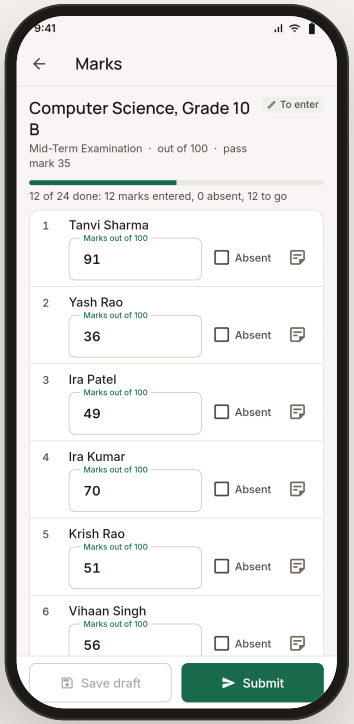

Home
Attendance to mark, today's lessons and to-dos.

Roll call
Tap present or absent for each student, or Mark all present.

Homework
Active, drafts and closed, with hand-in progress.

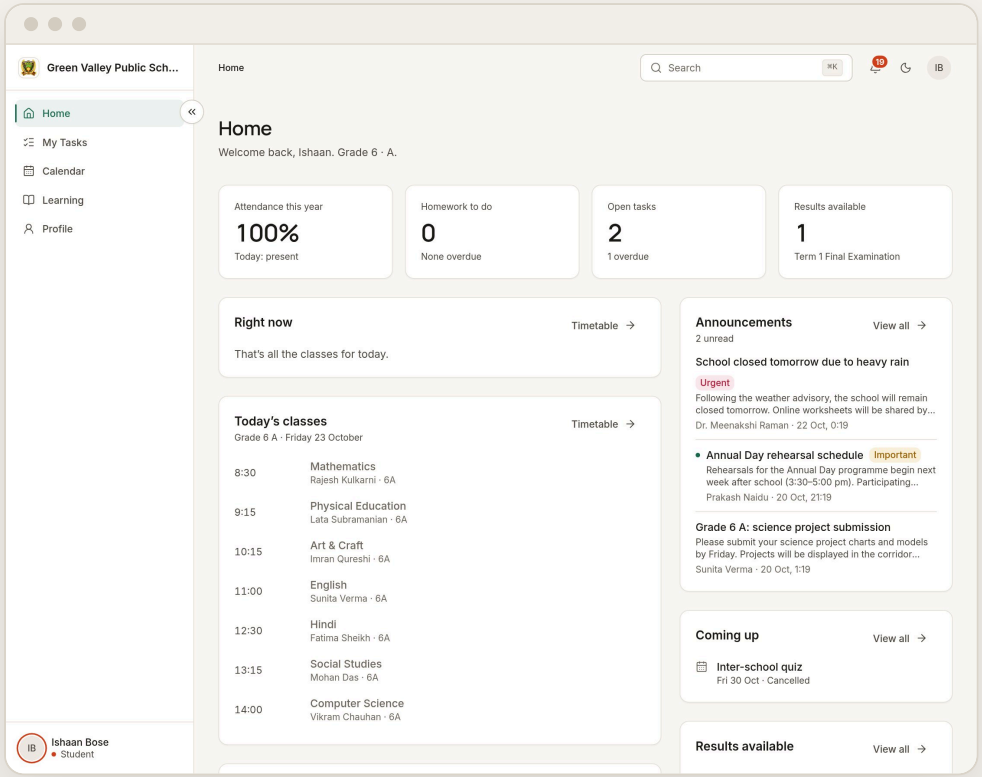

Marks
Enter marks for each student. Save a draft or submit.

STUDENTS · WEB

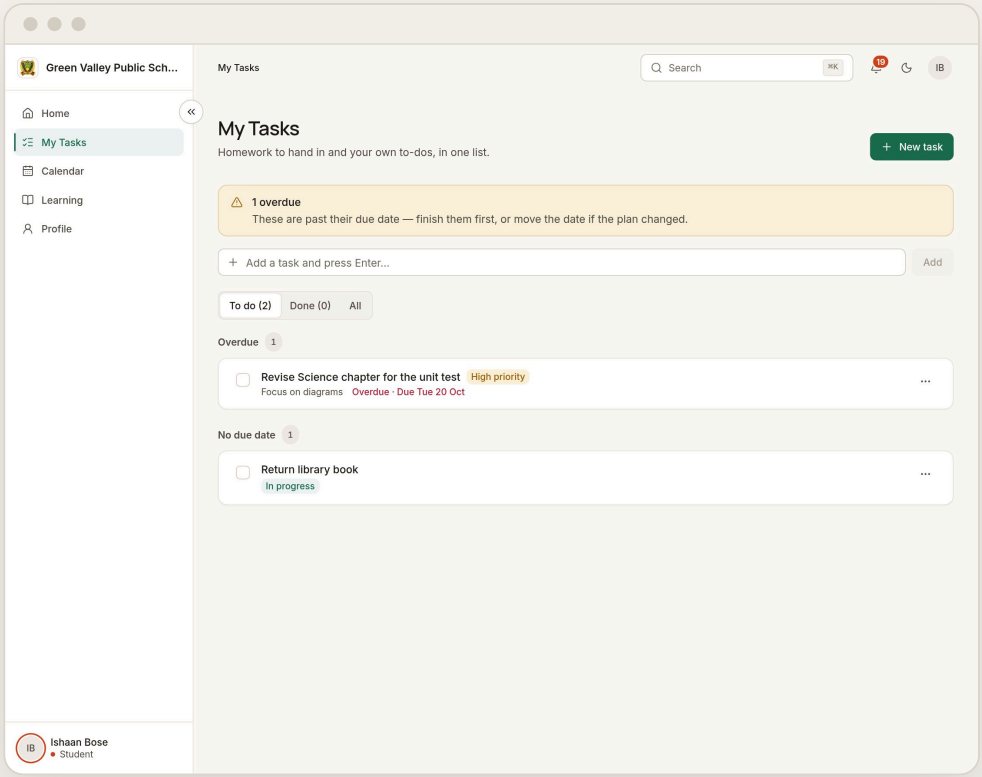

Today, at a glance

Students get five simple tabs: Home, My Tasks, Calendar, Learning and Profile. Home shows attendance, homework due, open tasks and results.

- Today’s classes, with the lesson happening now
- Announcements from the school
- Personal tasks next to homework

Student home
Attendance, homework to do, open tasks, results, today’s classes and announcements.

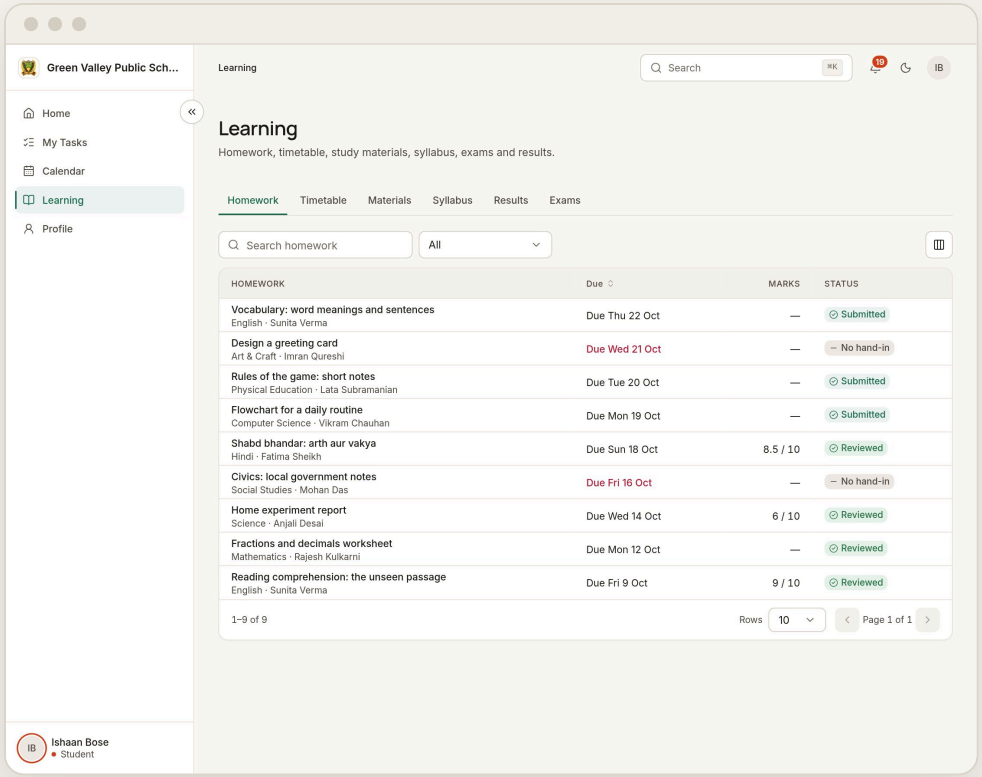

My Tasks
Homework and personal to-dos in one list, with overdue items flagged.

STUDENTS · WEB

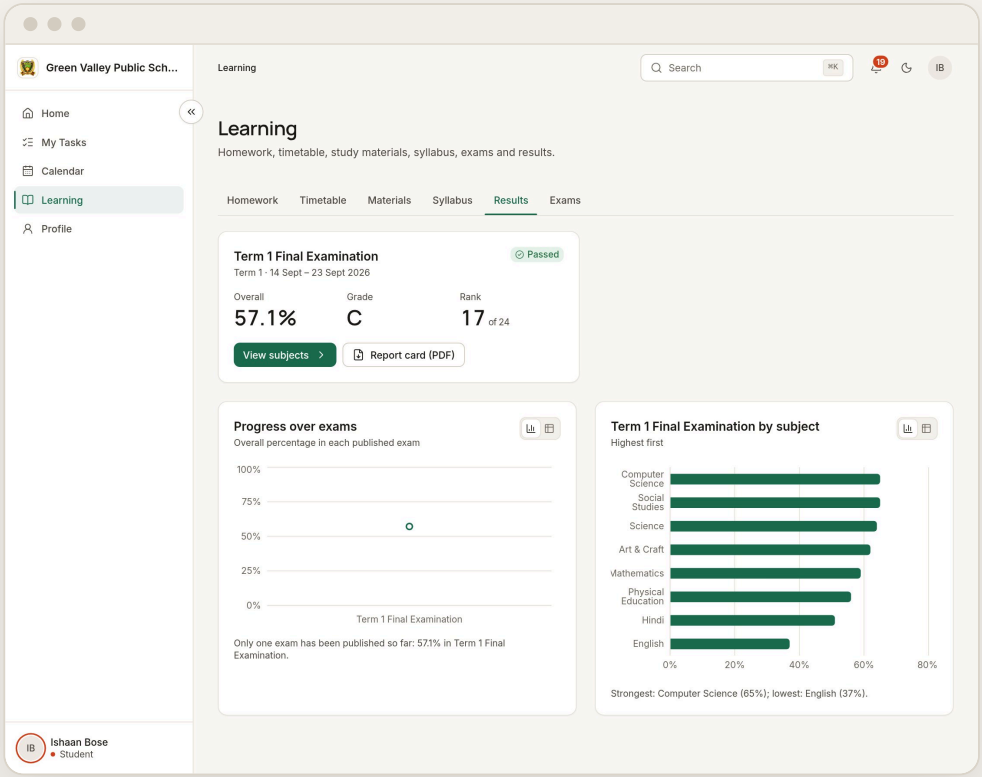

Homework, results and progress

The Learning tab holds homework with hand-in status, the timetable, study materials, syllabus and exams. Results show a term at a glance and progress across exams.

- Homework with due dates, status and marks
- Study materials and syllabus
- Report card as a PDF

Learning
Homework with due dates, hand-in status and marks.

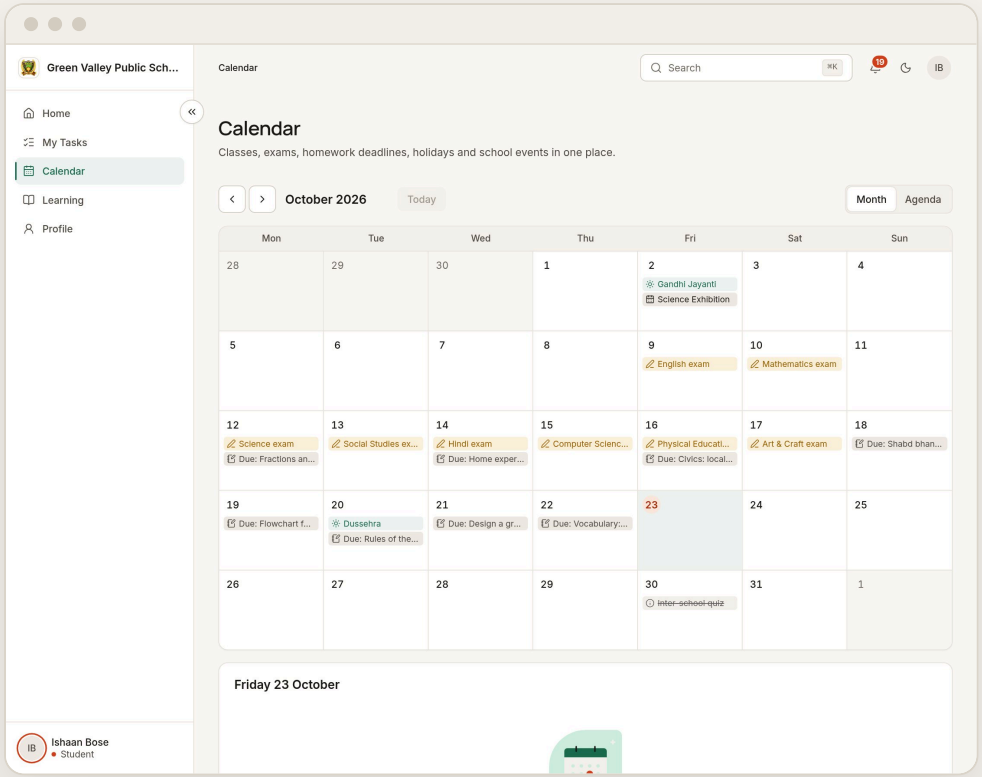

Results
Overall percentage, grade and class rank, with a chart by subject.

STUDENTS · WEB

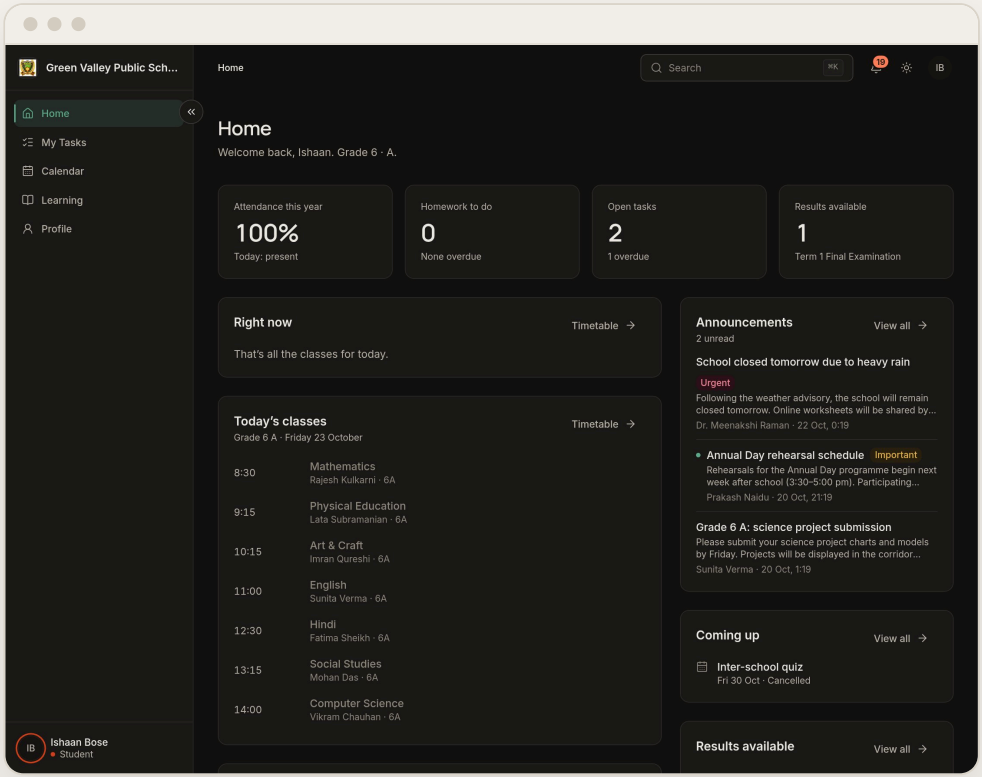

A calendar that includes your own deadlines

Classes, exams, homework deadlines, holidays and school events share one calendar, in month and agenda views.

- Exams and homework due dates on the same grid
- Holidays and school events

Calendar
Month view with exams, homework due dates and holidays.

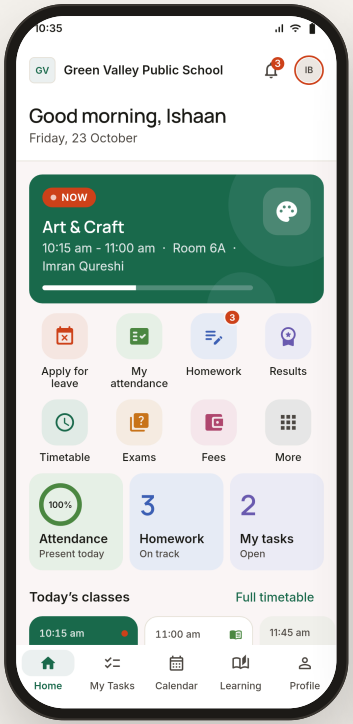

Dark mode
Available on every screen, for every role.

STUDENTS · MOBILE

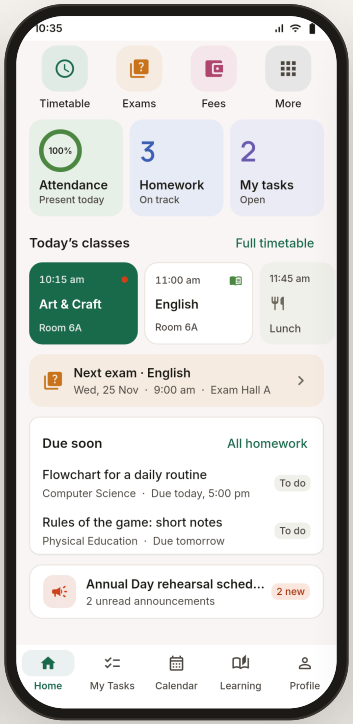

Everything for a student, on the phone

The home screen is short on purpose: what is on now, shortcuts for what students do most, and only what is due soon. The same five tabs as the web sit below.

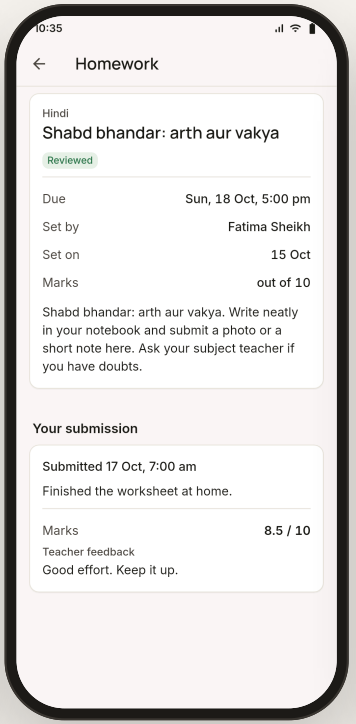

- Apply for leave, check attendance, homework and results in one tap
- Today’s classes as a swipeable row
- Homework detail with feedback from the teacher

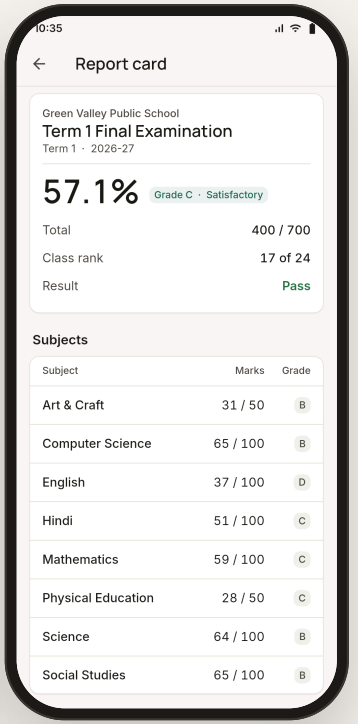

Home
The lesson on now, one-tap shortcuts and three numbers at a glance.

Today and due soon
Classes as a swipeable row, the next exam, homework due and the latest notice.

Homework detail
Instructions, due date, the student’s submission, marks and teacher feedback.

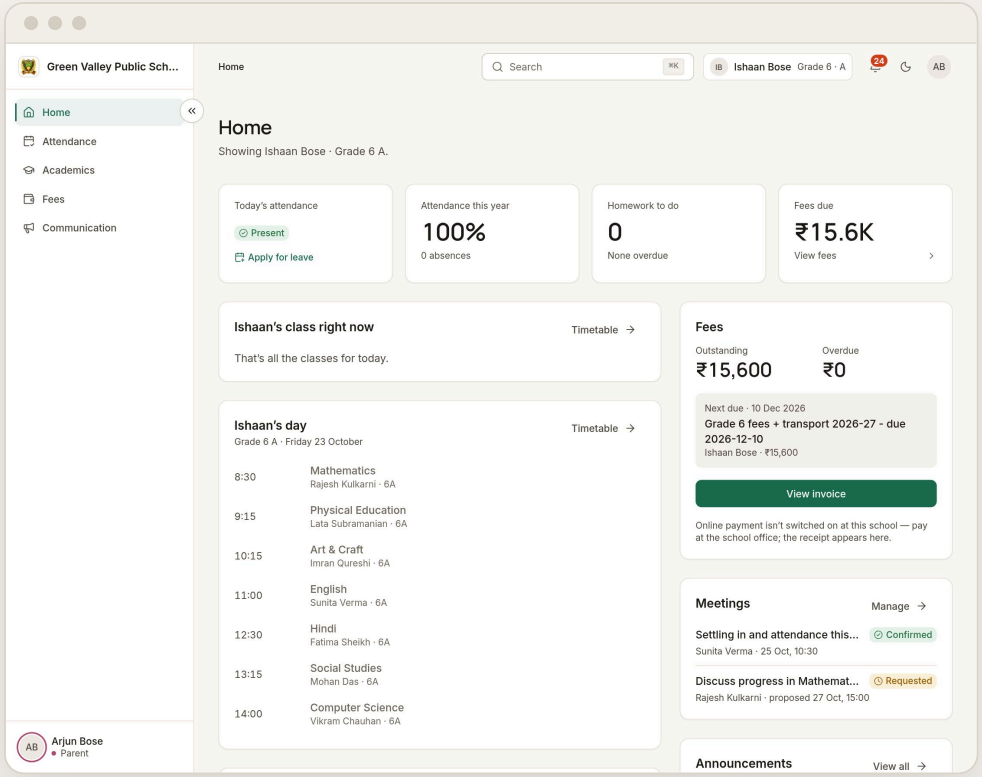

Report card
Term result with percentage, grade, rank and every subject.

PARENTS · WEB

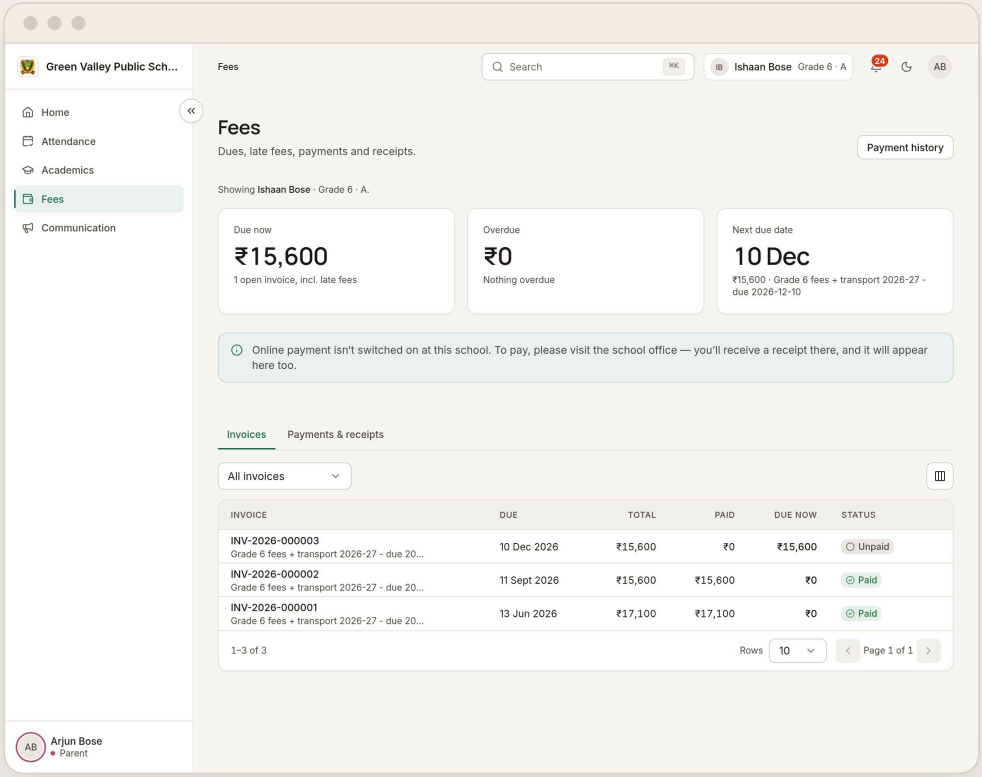

Every child, one account

Parents see only the children whose link the school has verified, and switch between them from the top bar.

- Attendance, homework and fees for the selected child
- Fee balance, next due date and receipts
- Parent–teacher meetings

Parent home
Attendance, homework to do, fees due, the child's day and meetings.

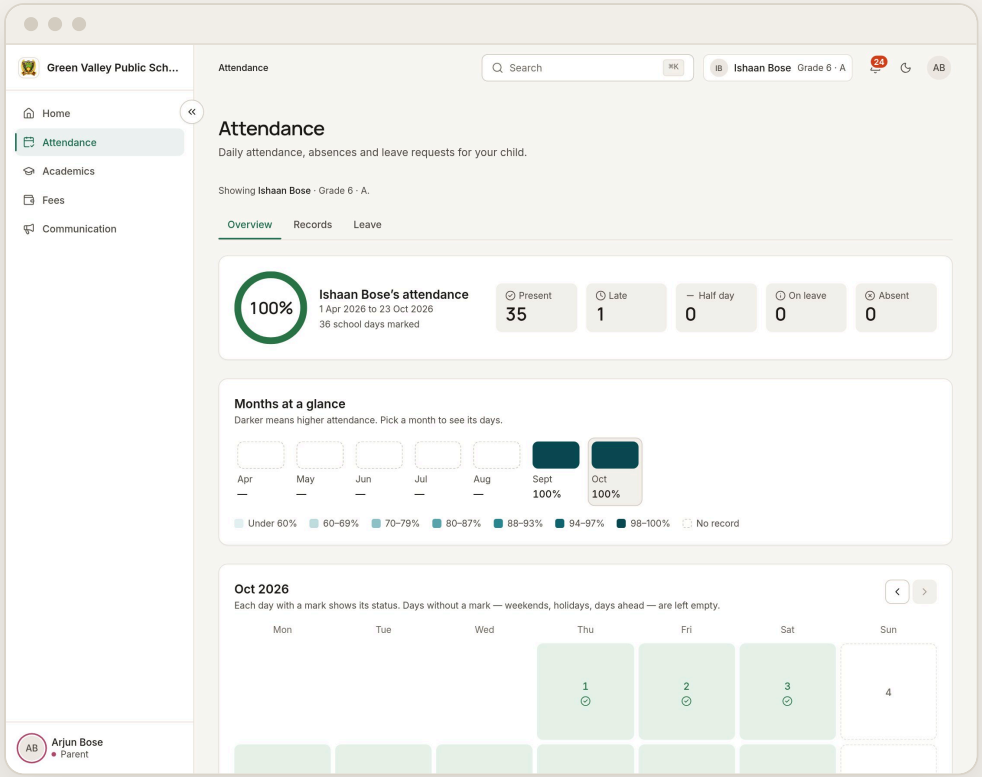

Fees
What is due now, overdue amounts, the next due date, invoices and payment history.

PARENTS · WEB

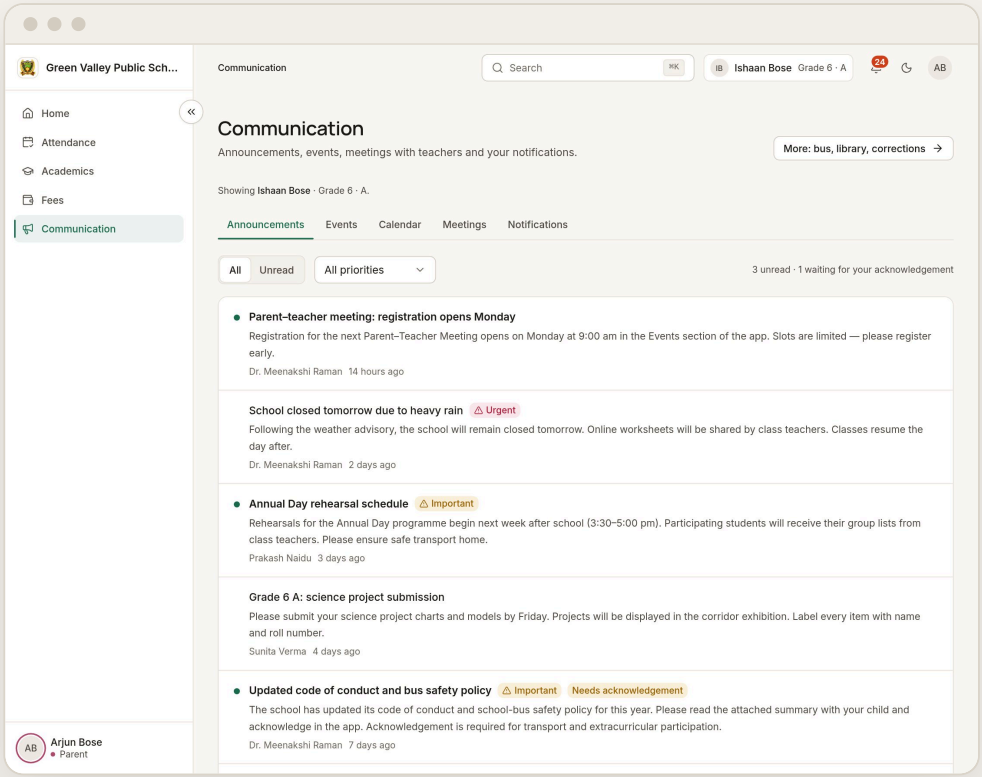

Attendance and school news

A month-by-month view shows attendance at a glance, with records and leave in their own tabs. Announcements, events and meetings arrive in one place.

- Attendance rate, daily counts and a monthly heat map
- Announcements with priority
- Events, calendar, meetings and notifications

Attendance
Attendance rate, daily counts and a month-by-month view.

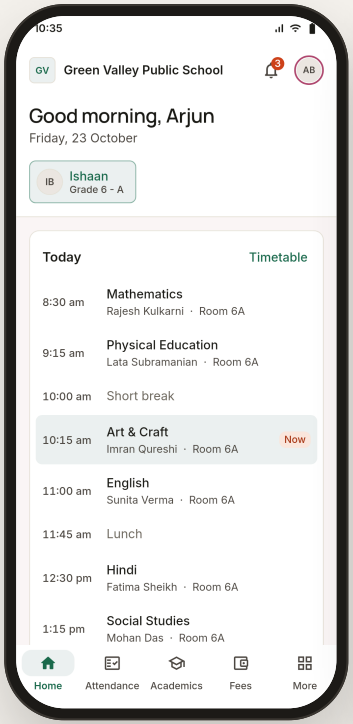

Communication
Announcements with priority, plus events, calendar, meetings and notifications.

PARENTS · MOBILE

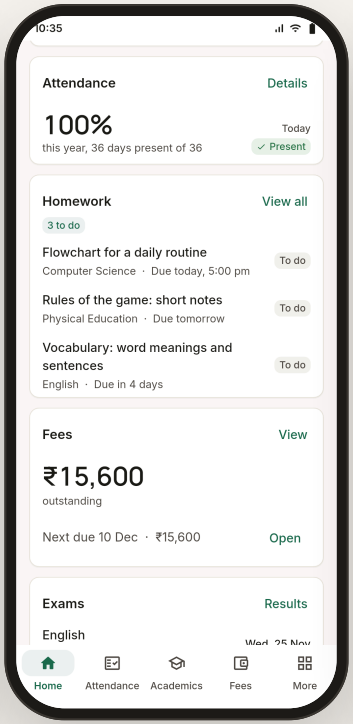

Follow the day, and the fees

Parents get the child selector, attendance, homework and fees on one Home screen, with the invoice details one tap away.

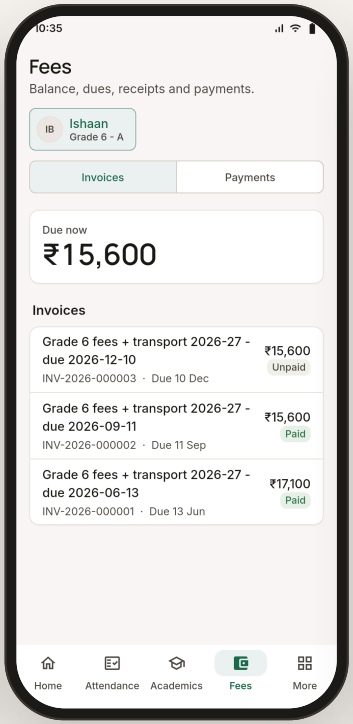

- A selector for each linked child
- Fee balance and next due date on Home
- Online payment appears when the school turns it on

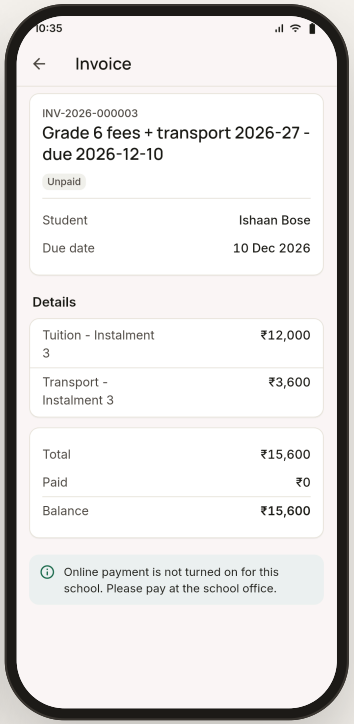

Home
Child selector and the day's timetable.

Attendance, homework, fees
Scroll for attendance, homework due, fees due and exams.

Fees
Due now, with the invoices for each child.

Invoice
Items, total, paid and balance.

SECURITY & PRIVACY

Built to keep a school's data private

Each school's data lives in its own database, and every request is checked for who is asking and which school they belong to.

A database per school

No shared tables of school data and no filter to forget. A sign-in from one school cannot open another.

Strong sign-in

Passwords are hashed with Argon2id. Access is short-lived, refresh tokens rotate, and repeated failures lock the account.

Role, scope and action

Every record is checked against what the person's role may do. Records out of scope are answered as not found.

Verified family links

A parent sees a child only after the school has verified the link.

Audit trail

Who changed what, and when, with secrets redacted. Records are archived rather than deleted.

Private notifications

Push messages never carry fees, marks or leave details, and recipients are resolved on the server.

Safe on the phone

HTTPS only, sign-in tokens in the device's secure storage, a biometric app lock and privacy screens on sensitive pages.

Files and money

Each file is checked before it is served, privately. Payments use idempotency keys and verified webhooks.

On the roadmap Two-factor sign-in for staff · app-integrity checks on the phone · object storage for files · an independent penetration test before go-live

PRICING & LICENCE

Per student, per academic year

One simple unit. A school pays for the students enrolled in an academic year. Staff, parents and administrator accounts are free and unlimited.

Only students are counted

Teachers, parents and office accounts never use a seat.

Counted once a year

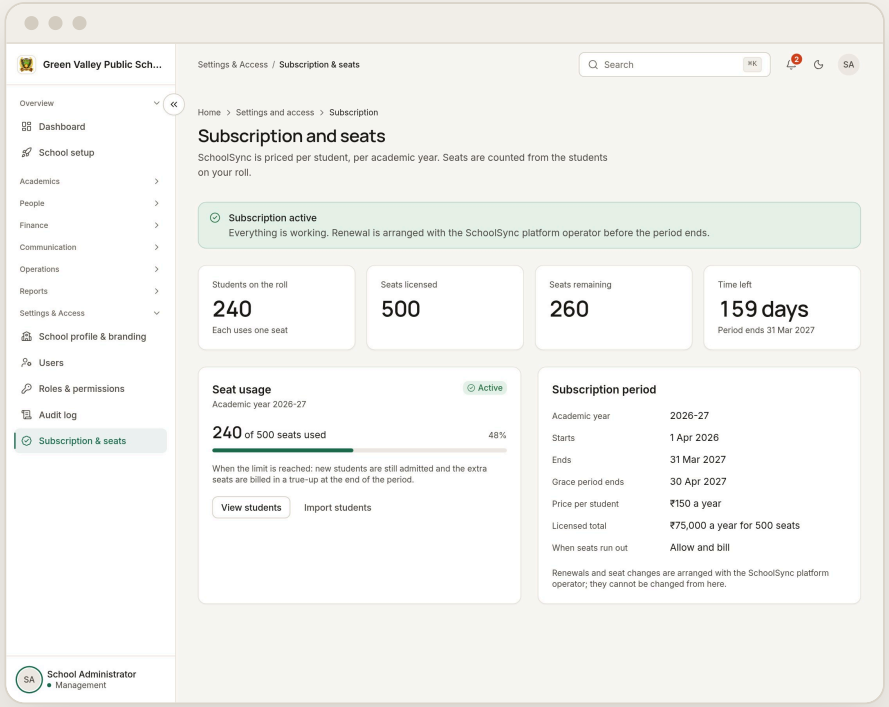

A student is billable once per academic year, whatever happens to their section or parents. Promotion creates next year's seat.

Seats that can grow

A school commits to a number of seats. At the limit its terms either block new admissions or bill the extra students at the end.

Never locked out

When a year ends there is a grace period of full access (30 days by default), then the school becomes read-only. Renewing restores editing at once.

What the administrator sees

Students on the roll, seats licensed and remaining, time left, and the school's terms.

TRIAL · ACTIVE — **Full access**
Inside the subscription year

GRACE — **Full access**
With renewal warnings

READ-ONLY — **Everything readable**
Changes pause until renewal

The price per student and the number of seats are agreed with each school. Usage is counted automatically through the year.

GOING LIVE

From an empty site to a school in use

Four steps take a school from nothing to teachers, students and parents using it every day.

1

Create the school's site

One command creates the school's own database, its default roles and its first administrator. Add the name, colour and logo.

2

Bring the people in

Import students and staff from CSV. Parents are linked to their children and the school verifies each link.

3

Set up academics and fees

Years, grades, subjects, timetable and fee structures, guided by the setup checklist on the management dashboard.

4

Switch on the apps

Teachers, students and parents sign in on the web or in the mobile app, which asks for the school once.

Every screen in this catalogue can be tried.

A demo school with sample students, staff, attendance, exams and fees is included, so a pilot can start with real screens, not slides.
